U.K. Standard

TQB0E2040-1

Features

■ 3D technology - Step into the 3D World™

Viewing 3D images on the Full HD panel

You can enjoy viewing 3D images on this TV by wearing the 3D Eyewear.

■ FULL HD 3D

FULL HD 3D is the technology for viewing 3D images on the Full HD panel.

You can experience the ultimate of 3D images with realistic ambience and powerful depth.

■ RealD 3D

This TV uses the 3D technology of RealD. RealD is one of the inventors in 3D technology.

■ freesat HD tuner built-in

Receives freesat - free digital satellite broadcasts in the UK

This TV has a built-in freesat HD tuner.

freesat is a free digital TV service which broadcasts via satellite so you can receive TV, radio, interactive TV, and HD TV with crystal clear reception.

You can enjoy sharp pictures, vivid colours, multi-channel sound, and various services with the interactive content.

■ DVB-T / DVB-T2 tuner built-in

Receives DVB (Digital Video Broadcasting) digital terrestrial broadcasts

DVB-T2 is an advanced digital terrestrial system for more efficient transmission.

Available DVB-T2 broadcasts will be tuned automatically when you perform DVB Auto Setup.

■ GUIDE Plus+ (p. 21)

This TV supports Gemstar-TV Guide sent from the GUIDE Plus+ system.

■ Sharp pictures and clear sound with HDMI connection (p. 102)

Enjoy high definition digital picture and high quality sound by using an HDMI cable.

- This TV supports HDMI (Version 1.4 with 3D, Content Type, Audio Return Channel), Deep Colour, x.v.Colour™.

■ Using USB devices

Enjoy recording and playback the digital TV programmes to the USB HDD. (p. 68 and p. 77)

Enjoy the photo, video and music in the USB Flash Memory on Media Player. (p. 72)

Wireless LAN Adaptor for the network connection. (p. 6 and p. 13)

Entering characters with the USB Keyboard in VIERA CAST. (p. 89)

■ Timer Programming (p. 22 and p. 56)

Timer Programming enables you to use functions such as programme reminder and programme recording to the external recorder / registered USB HDD.

■ VIERA IMAGE VIEWER - SD Card viewer in Media Player (p. 72 - 76)

Enjoy your photos or videos recorded on an SD Card on the TV screen.

■ SDXC Card

This TV supports SDXC Card. SDXC is the latest standard of SD Card and a higher storage capacity card.

■ AVCHD

It is possible to play moving pictures recorded on an SD Card or a USB Flash Memory in AVCHD format.

AVCHD is a high definition video recording format. (p. 72)

■ DivX

Offers good compatibility when going from PC to TV, etc. for easy enjoyment of moving pictures. DivX is a video codec that was developed by DivX, Inc. (p. 101)

■ DLNA

DLNA is a standard that makes digital electronics easier and more convenient to use on a home network. For example, you can enjoy watching photos and videos stored in the PC connected to your home network by accessing from the TV. (p. 86)

■ VIERA CAST - Enjoy great web entertainment (p. 89)

Enjoy the internet contents on the TV such as photos, videos, weather, video communication (ex. Skype™), etc. through an easy-to-use web interface that is built into the TV.

■ Link up and control the connected equipment with “Q-Link” and “VIERA Link” (p. 90 - 97)

Q-Link and VIERA Link provide easy recording and playback, creation of a home theatre without complicated settings, etc.

■ VIERA TOOLS - Display special feature icons for easy accessibility (p. 34)

Special features (such as VIERA Link, Media Player and DLNA operations) can be accessed easily by using the VIERA TOOLS button.

■ CONEQ (p. 37)

CONEQ is a technology to transduce the sound from speakers. You can enjoy sophisticated sound true to the original one.

Digital Switchover for Terrestrial broadcasts

Starting in late 2007 and ending in 2012, TV services in the UK will go completely digital, TV region by TV region.

If you have any questions, please call Digital UK on **08456 50 50 50** or visit **www.digitaluk.co.uk**

Digital Switchover will cover a period of several weeks. When it starts you will lose all Analogue TV channels and some Digital TV channels will be missing.

You will need to retune your TV each time this happens to recover your digital channels. Analogue channels are permanently turned off, it will not be possible to recover them.

- To retune your TV → “Auto Setup” in “DVB Tuning Menu”-DVB mode (p. 45)

Users of cable or satellite boxes should still retune the TV to continue to receive Freeview channels via their aerial. (Your Analogue channel for viewing Cable or Satellite services will change to a new position.)

- Due to the digital reception technologies involved, quality of the digital signals may be relatively low in some cases, despite good reception of analogue channels.

■ FULL HD

This TV uses a high definition panel to produce high definition pictures close to their original resolution.

■ HD TV 1080p

This TV supports high definition TV signals.

■ Dolby Digital Plus decoder

It is possible to decode Dolby Digital Plus audio track (multi-channel sound) and output as a Dolby Digital multi-channel sound signal from the DIGITAL AUDIO OUT terminal.

■ Owner ID (p. 61)

Owner ID is an anti-theft function. Entering the PIN number and owner's personal information will help the Police to determine the owner in the case of theft.

■ Supports Audio Description signal (p. 17 and p. 37)

Audio Description (when broadcast) adds an additional soundtrack to describe events on screen (narration) and aids understanding and enjoyment, particularly for visually-impaired viewers.

You can switch Audio Description service Auto or Off, and adjust the volume of the description soundtrack independently of the main volume.

Neo PDP

Realizes high picture quality and energy efficient panel.

Intelligent Frame Creation

This increases the frame count and removes juddering movements, for smooth and flicker-less motion images with high resolution.

INFINITE BLACK PRO

A wide contrast ratio will deliver pictures with a deep, rich black level and a brighter white level for greater image depth.

THX Certified Display

Faithfully reproduces the image quality of THX movies that the filmmakers intended.

24p Smooth Film

This item is displayed instead of "Intelligent Frame Creation" when 24p signal input, and produces smoother playback of 24p source movies.

digital tick

The digital tick logo indicates that a digital tuner is built-in.

Freeview HD

Freeview HD is the way to enjoy high definition digital TV for free.

■ Do not display a still picture for a long time

This causes the image to remain on the plasma screen ("image retention").

This is not considered a malfunction and is not covered by the warranty.

Typical still images

- Channel number and other logos
- Image displayed in 4:3 mode
- Video game
- Computer image

To prevent image retention, contrast is lowered automatically after a few minutes if no signals are sent or no operations are performed. (p. 105)

■ Keep the TV away from these types of equipment

- Electronic equipment
Do not place video equipment too close to the TV, electromagnetic interference may distort pictures / sound.
- Equipment with an infrared sensor
This TV emits infrared rays which may interfere with the operation of other equipment.

Safety Precautions

Warning

■ Mains plug and lead

To help avoid risk of electrical shock, fire, damage or injury, please follow the warnings below:

- This TV is designed to operate on AC 220-240 V, 50 / 60 Hz.
- Insert the mains plug fully into the socket outlet.
- Ensure that the mains plug is easily accessible.
- Remove the mains plug when cleaning the TV.

- Do not touch the mains plug with a wet hand.

- Do not damage the mains lead.

- Do not place a heavy object on the lead.

- Do not place the lead near a high temperature object.

- Do not pull on the lead. Hold onto the mains plug body when disconnecting the plug.

- Do not move the TV with the lead plugged into a socket outlet.
- Do not twist the lead, bend it excessively or stretch it.
- Do not use a damaged mains plug or socket outlet.
- Ensure the TV does not crush the mains lead.
- Do not use any mains lead other than that provided with this TV.
- Ensure the earth pin on the mains plug is securely connected to prevent electrical shock.
- An apparatus with CLASS I construction shall be connected to a mains socket outlet with a protective earthing connection.

If you detect anything unusual, immediately switch off the mains supply switch and remove the mains plug.

AC 220-240 V
50 / 60 Hz

IMPORTANT: THE MOULDED MAINS PLUG

FOR YOUR SAFETY, PLEASE READ THE FOLLOWING TEXT CAREFULLY.

This TV is supplied with a moulded three pin mains plug for your safety and convenience. A 10 amp fuse is fitted in this mains plug. Shall the fuse need to be replaced, please ensure that the replacement fuse has a rating of 10 amps and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the mains plug contains a removable fuse cover, you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the mains plug must not be used until a replacement cover is obtained.

A replacement fuse cover may be purchased from your local dealer.

Do not cut off the mains plug.

Do not use any other type of mains lead except the one supplied with this TV.

The supplied mains lead and moulded plug are designed to be used with this TV to avoid interference and for your safety.

If the socket outlet in your home is not suitable, get it changed by a qualified electrician.

If the plug or mains lead becomes damaged, purchase a replacement from an authorized dealer.

WARNING: – THIS TV MUST BE EARTHED.

How to replace the fuse.

Open the fuse compartment with a screwdriver and replace the fuse.

Warning

Take care

To help avoid risk of electrical shock, fire, damage or injury, please follow the warnings below:

- Do not remove covers and never modify the TV yourself as live parts are accessible when they are removed. There are no user serviceable parts inside. 
- Do not expose the TV to rain or excessive moisture. This TV must not be exposed to dripping or splashing water and objects filled with liquid, such as vases, must not be placed on top of or above the TV. 
- Do not expose the TV to direct sunlight and other sources of heat. To prevent fire never place any type of candle or naked flame on top or near the TV. 
- Do not place the TV on sloped or unstable surfaces. 
- Do not insert foreign objects into the TV through the air vents.
- Do not use an unapproved pedestal / mounting equipment. Be sure to ask your local Panasonic dealer to perform the setup or installation of approved wall-hanging brackets.
- Do not apply strong force or impact to the display panel.

To prevent the spread of fire, keep candles or other open flames away from this product at all times

Small object

This product contains possibly dangerous parts that can be breathed in or swallowed by young children accidentally.

- Keep the dangerous parts out of reach of young children.
- Do not allow children to handle SD Card. As with any small object, the SD Card could be swallowed by young children. Please remove SD Card immediately after use and store out of reach of young children.

Caution

Ventilation

Allow sufficient space around the TV in order to help prevent excessive heat, which could lead to early failure of some electronic components.

- Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, tablecloths and curtains. 
- Whether you are using the pedestal or not, always ensure the vents in the bottom of the TV are not blocked and there is sufficient space to enable adequate ventilation.

Minimum distance

Moving the TV

Before moving the TV, disconnect all cables.

- The TV is heavy. Move the TV with at least two people. Support as shown to avoid injury by the TV tipping or falling.
- Transport only in upright position. Transporting the TV with its display panel facing upward or downward may cause damage to the internal circuitry.

When not in use for a long time

This TV will still consume some power even in the Off mode, as long as the mains plug is still connected to a live socket outlet.

- Remove the mains plug from the wall socket when the TV is not in use for a prolonged period of time.

Excessive volume

Do not expose your ears to excessive volume from the headphones. Irreversible damage can be caused.

Optional accessories

Please contact your nearest Panasonic dealer to purchase the recommended optional accessories. For additional details, please refer to the manual of the optional accessories.

- Wireless LAN Adaptor
 - DY-WL10E-K

Caution

- To use the Wireless LAN Adaptor, an access point needs to be obtained.
- It is recommended to use the Wireless LAN Adaptor with the extension cable.
- To avoid malfunctions caused by radio wave interference, keep the TV away from the devices such as other wireless LAN devices, microwaves and the devices that use 2.4 GHz and 5 GHz signals when using the Wireless LAN Adaptor.
- Depending on the area, this optional accessory may not be available.
- Additional information for Wireless LAN Adaptor and access point may be on the following web site. (English only)
<http://panasonic.jp/support/global/cs/tv/>

- 3D Eyewear set
(Battery type)
 - TY-EW3D10E

- (Rechargeable type, available in 3 sizes from autumn 2010)
- TY-EW3D2LE (Large)
 - TY-EW3D2ME (Medium)
 - TY-EW3D2SE (Small)

- To purchase 3D Eyewears, please contact your Panasonic dealer.

- Communication Camera
 - TY-CC10W

Caution

- This camera can be used on VIERA CAST (p. 89).
- Please also read the manual of the camera.
- Depending on the area, this optional accessory may not be available. For details, consult your local Panasonic dealer.

- Wall-hanging bracket
 - TY-WK4P1RW

Rear of the TV

Holes for wall-hanging bracket installation

Screw for fixing the TV onto the wall-hanging bracket (not supplied with the TV)

Depth of screw:
minimum 15 mm,
maximum 30 mm

Diameter: M8

(View from the side)

Warning

- Using other wall-hanging brackets, or installing a wall-hanging bracket by yourself have the risk of personal injury and product damage. In order to maintain the unit's performance and safety, be absolutely sure to ask your dealer or a licenced contractor to secure the wall-hanging brackets. Any damage caused by installing without a qualified installer will void your warranty.
- Carefully read the instructions accompanying optional accessories, and be absolutely sure to take steps to prevent the TV from falling off.
- Handle the TV carefully during installation since subjecting it to impact or other forces may cause product damage which will void your warranty.
- Take care when fixing wall brackets to the wall. Always ensure that there are no electrical cables or pipes in the wall before hanging bracket.
- To prevent fall and injury, remove the TV from its fixed wall position when it is no longer in use for an extended period of time.

Attaching / removing the pedestal

To help avoid risk of damage or injury by the TV tipping or falling, please follow the warnings and cautions below:

Warning

- Do not disassemble or modify the pedestal.

Caution

- Do not use with any other TVs or displays.
- Do not use the pedestal if it becomes warped or physically damaged. If this occurs, contact your nearest Panasonic dealer immediately.
- During setup, make sure that all screws are securely tightened.
- Ensure that the TV does not suffer any impact during installation of the pedestal.
- Ensure that children do not climb onto the pedestal.
- Install or remove the TV from the pedestal with at least two people.

Ⓐ Assembly screw (3)
(silver)
● XYN5+F18FN

M5 × 18

Ⓑ Assembly screw (4)
(black)
● THEL080N

M5 × 30

Ⓒ Pole
● TBLA3828

Ⓓ Base
● TBLX0184

Assembling the pedestal

Use the assembly screws Ⓐ to fasten the pole Ⓒ to the base Ⓓ securely.

- Make sure that the screws are securely tightened.
- Forcing the assembly screws the wrong way will strip the threads.

Securing the TV

Use the assembly screws Ⓑ to fasten securely.

- Tighten the four assembly screws loosely at first, then tighten them firmly to fix securely.
- Carry out the work on a horizontal and level surface.

(View from the bottom)

To remove the pedestal

When removing the pedestal from the TV, remove the assembly screws Ⓑ first, and then, pull out the TV from the pedestal.

Caution

- Do not remove the assembly screws Ⓐ before removing the pedestal from the TV to prevent falling over.

Identifying Controls

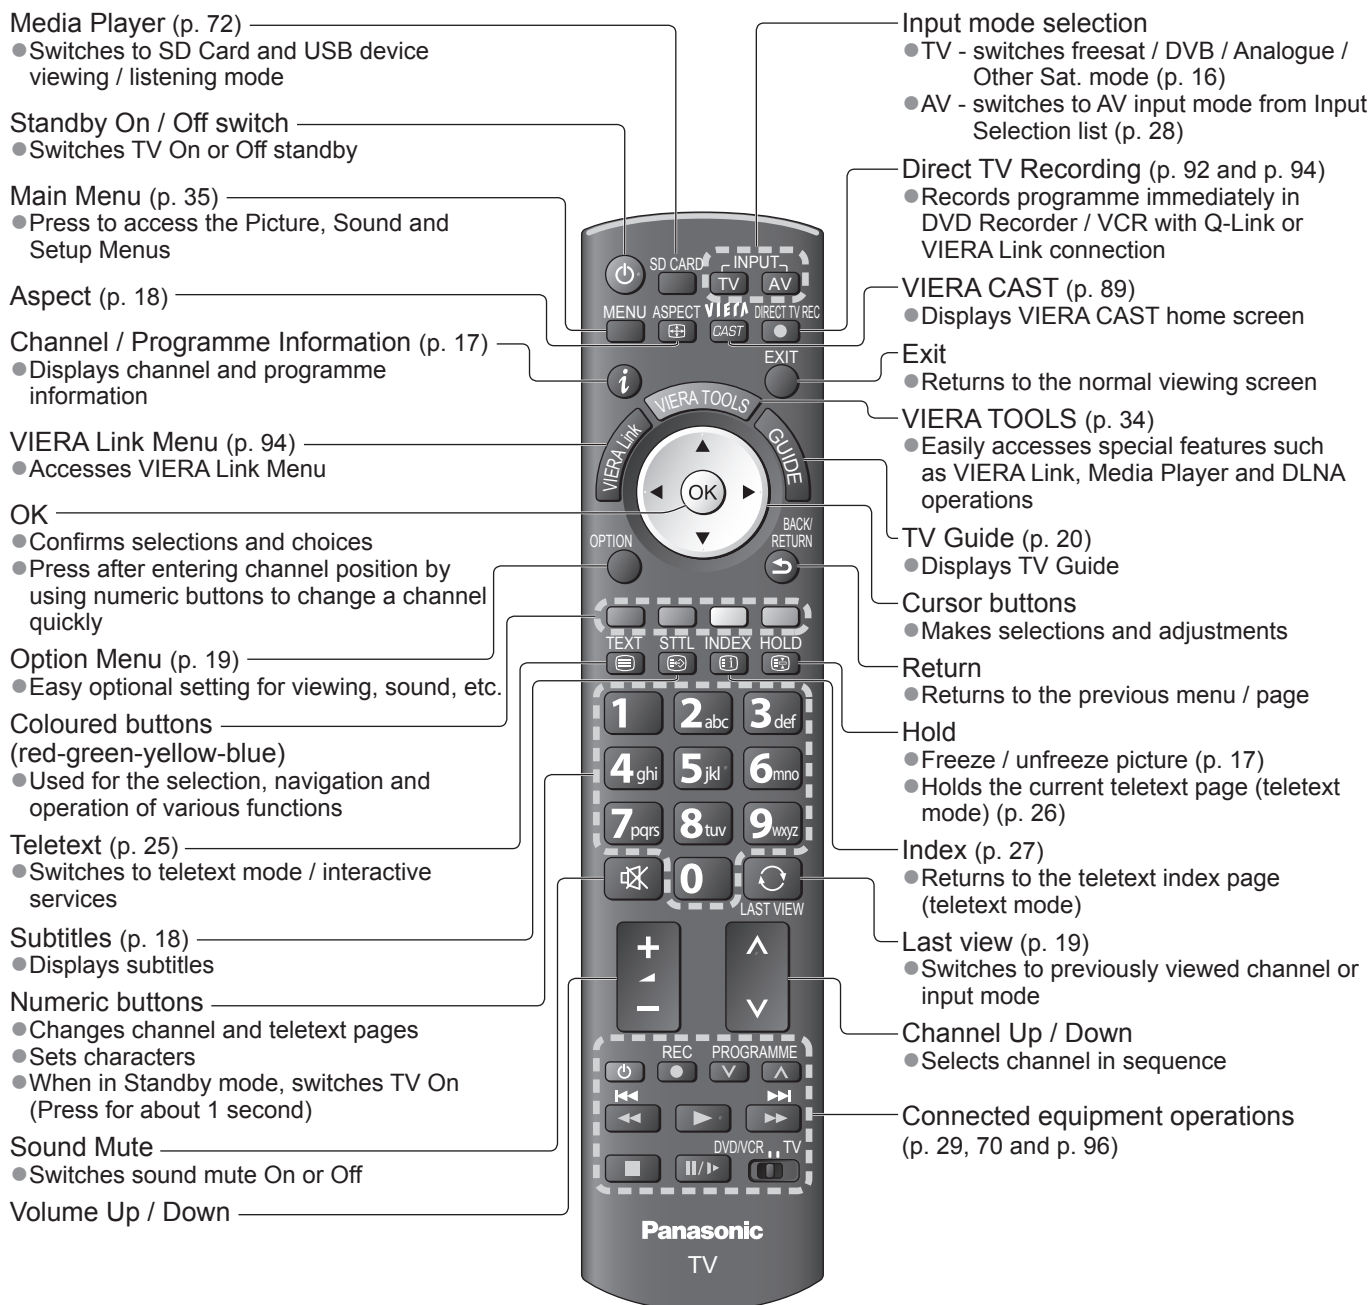

Remote Control

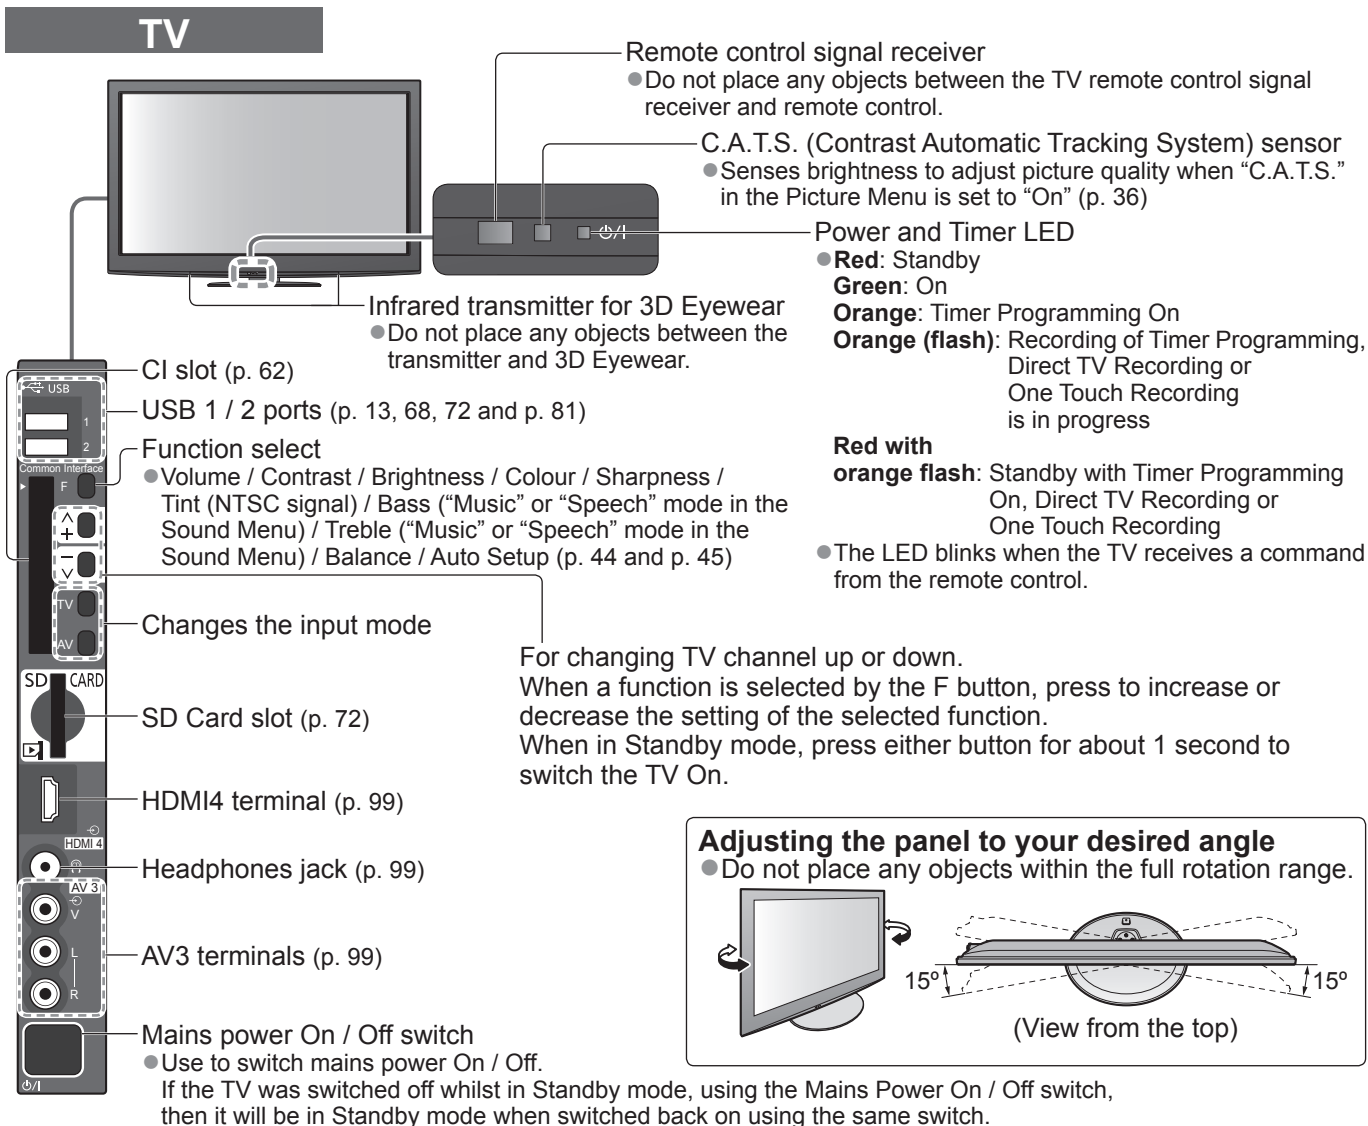

■ Installing / removing remote's batteries

Caution

- Incorrect installation may cause battery leakage and corrosion, resulting in damage to the remote control.
- Do not mix old and new batteries.
- Do not mix different battery types (such as alkaline and manganese batteries).
- Do not use rechargeable (Ni-Cd) batteries.
- Do not burn or break up batteries.
Batteries must not be exposed to excessive heat such as sunshine, fire, etc.
- Do not disassemble or modify the remote control.

Using the On Screen Displays

Many features available on this TV can be accessed via the On Screen Display menu.

How to use remote control

- | | | | |
|--|--|--|--|
| | Open the main menu | | Exit the menu system and return to the normal viewing screen |
| | Move the cursor / select the menu item | | Move the cursor / adjust levels / select from a range of options |
| | Access the menu / store settings after adjustments have been made or options have been set | | Return to the previous menu |

ON SCREEN HELP Instructions box - Operation guide

Example (Owner ID):

Operation guide will help you.

Auto power standby function

- The TV will automatically go to Standby mode in the following conditions:
 - no signal is received and no operation is performed for 30 minutes in Analogue TV mode
 - "Off Timer" is active in the Setup Menu (p. 19)
 - no operation is performed for the period selected in "Auto Standby" (p. 40)
- This function does not affect the recording of Timer Programming, Direct TV Recording and One Touch Recording.

Basic Connection

External equipment and cables shown are not supplied with this TV.

Please ensure that the unit is disconnected from the mains socket before attaching or disconnecting any leads.

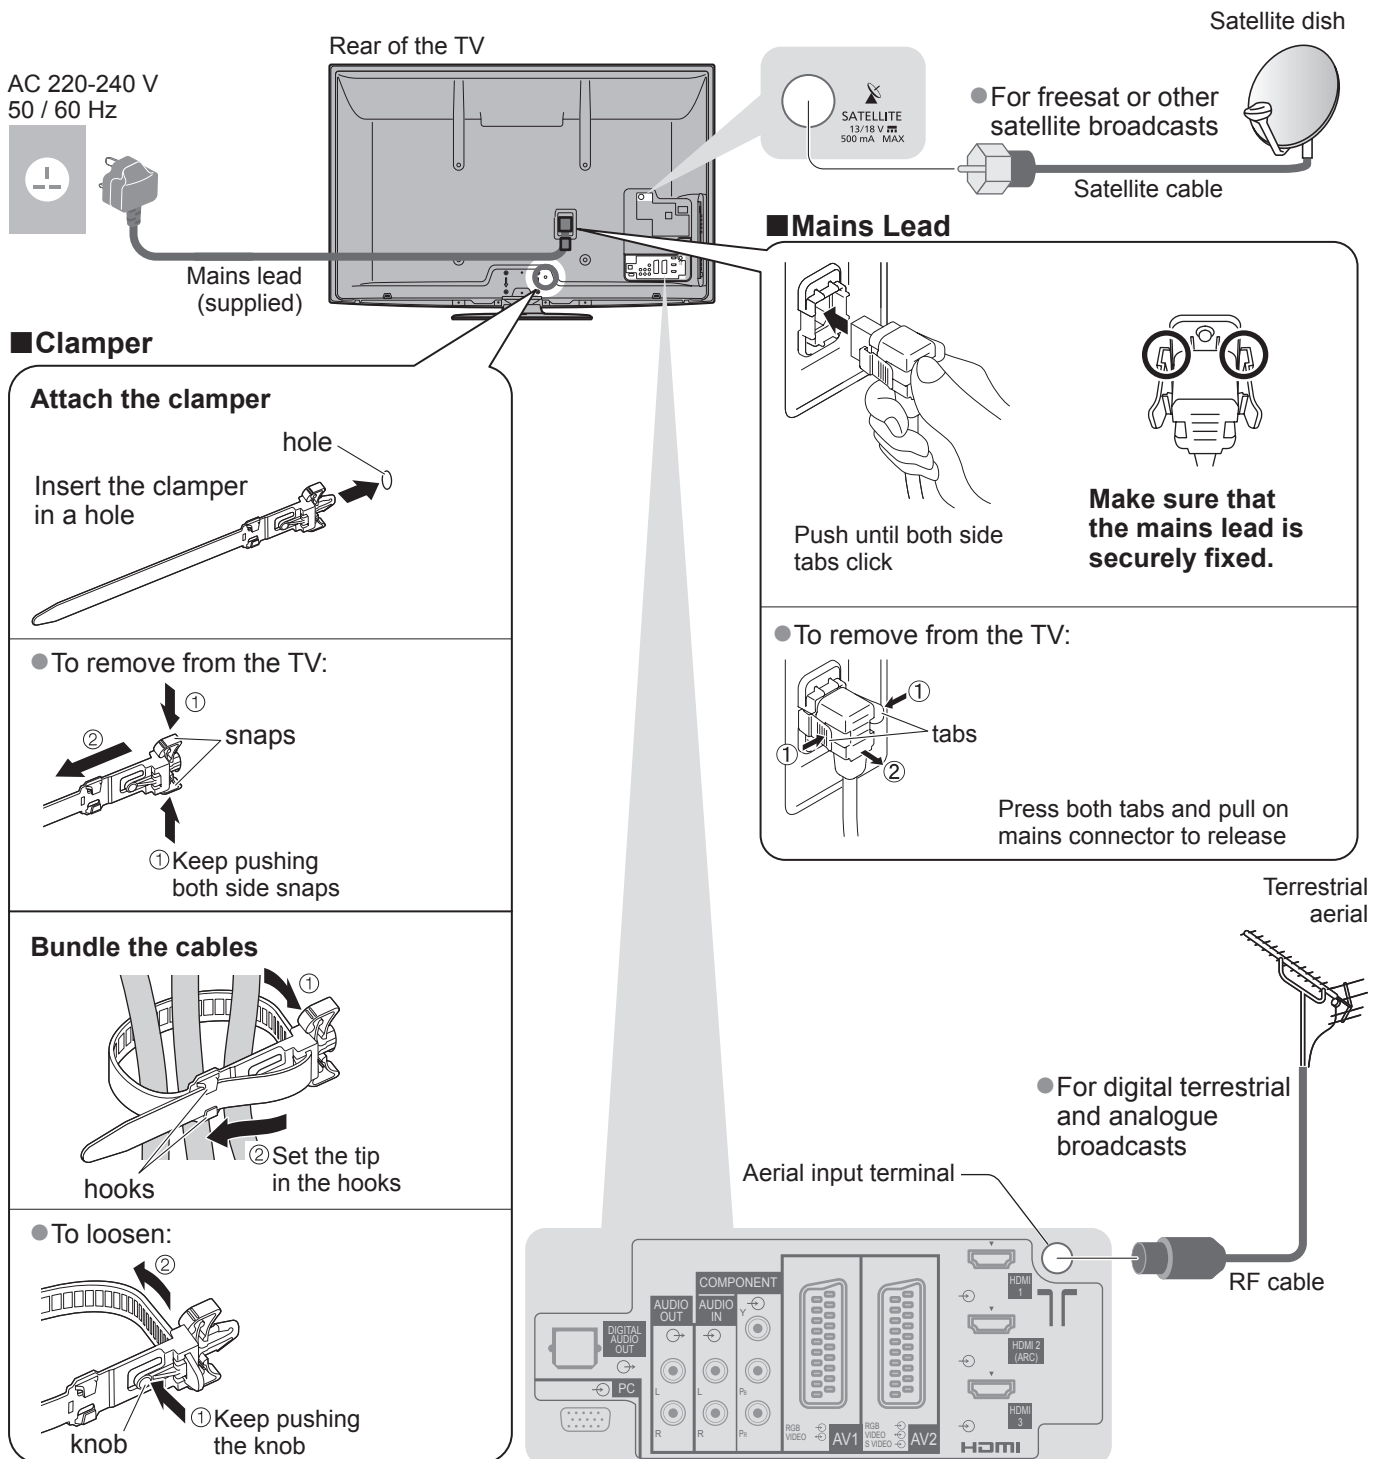

When disconnecting the mains lead, be absolutely sure to disconnect the mains plug at the socket outlet first.

There are some restrictions on placement for viewing 3D images. For details → p. 30 and p. 31

Example 1 Connecting dish or aerial

TV only

- The freesat channel uses Astra 2 at 28.2° East, and Eurobird 1 at 28.5° East satellites. To ensure your satellite dish is correctly installed please consult your freesat registered dealer.

- Do not bundle the Satellite cable, RF cable and mains lead together (could cause distorted image).
- Fix cables with clampers as necessary.
- When using the optional accessory, follow the option's assembly manual to fix cables.

Example 2 Connecting DVD Recorder / VCR and Player

TV, DVD Recorder / VCR and Player

Example 3 Connecting DVD Recorder / VCR and Cable TV box

TV, DVD Recorder / VCR and Cable

Note

- To watch 3D contents → p. 30
- Connect to the TV's AV2 for a DVD Recorder / VCR supporting Q-Link (p. 92).
- Connect to the TV's AV1 for a Cable TV box.
- For HDMI-compatible equipment, it is possible to connect to HDMI terminals (HDMI1 / HDMI2 / HDMI3 / HDMI4) by using HDMI cable (p. 98).
- Network connection → p. 13 and p. 81
- Q-Link connection → p. 90
- VIERA Link connection → p. 90 and p. 91
- Please also read the manual of the equipment being connected.

Auto Setup

Search and store TV channels automatically.

- These steps are not necessary if the setup has been completed by your local dealer.
- Please complete connections (p. 10 and p. 11) and settings (if necessary) of the connected equipment before starting Auto Setup. For details of settings for the connected equipment, read the appropriate manual.

1

Plug the TV into mains socket and switch On (Takes a few seconds to be displayed)

- If the red LED shows on the TV, press the Standby On / Off switch on the remote TV control for at least 1 second to turn the TV On.

Auto Setup will start to search for TV channels and store them in the numbered order as specified by the broadcasters.

- If “freesat Auto Setup” cannot be done completely
➔ “FAQs” (p. 105)

(freesat tuning)

- Actual number of channels may differ due to channel duplication.

(DVB and Analogue tuning)

If Q-Link, or similar technology (p. 92), compatible recorder with analogue tuner is connected, analogue channel setting is automatically downloaded to the recorder. (Digital channel setting is not downloaded.)

- If downloading has failed, you can download later through the Setup Menu.
➔ “Q-Link Download” (p. 38)

2

Enter your postcode

- Your postcode is required to receive local services and sort the channel order. Please ensure to include a space when entering your postcode.

- If you skip this step, the default postcode (central London) will be set.

How to enter the postcode

Set characters one by one

- You can set characters by using numeric buttons.
➔ “Characters table for numeric buttons” (p. 101)

Exit to go to next step

(continued to the next page)

3

Setup the wireless LAN connection

Setup the wireless LAN connection to enable the network service functions (p. 80).
 (If you do not wish to use wireless LAN connection or the network service functions, skip this step.)

- To setup the wireless LAN connection, the Wireless LAN Adaptor (optional accessory) is required.
 For the information about the Wireless LAN Adaptor → “Optional accessories” (p. 6)
- Confirm the encryption key, settings and positions of your access point before starting setup. For details, read the manual of the access point.
- Please note that this TV does not support wireless public access points.
- To use a LAN cable instead of the Wireless LAN Adaptor → p. 83

① connect the Wireless LAN Adaptor to the USB 1 or 2 port

You can setup the wireless LAN connection later → “Network Setup” (p. 84)

- To skip this step → EXIT or select “No”

Wireless LAN connection setup starts

Select the connection type

- If your access point supports WPS (Push button), then select this option. If not, select “Search for access point”.

WPS(Push button)

Press the WPS button on the access point until the light flashes. And then, press the OK button to connect the Wireless LAN Adaptor and the access point.

- Ensure that your access point supports WPS for this setup.
- WPS: Wi-Fi Protected Setup™

Search for access point

Access points found automatically are listed.

No.	SSID	Wireless Type	Encrypt	Encryption
1	Access Point A	11n(60Hz)	☐	TKIP
2	Access Point B	11n(60Hz)	☑	TKIP
3	Access Point C	11n(60Hz)	☐	TKIP

Select your desired access point

- To search access points again → yellow
- For the information of the highlighted access point → i
- To set manually (p. 85) → red

☐ : Encrypted access point

Access the encryption key input mode

- If the selected access point is not encrypted, the confirmation screen will be displayed. It is recommended to select the encrypted access point.

Enter the encryption key of the access point

Set characters one by one

Store

- You can set characters by using numeric buttons. → “Characters table for numeric buttons” (p. 101)

Select “Yes”

- To re-enter the encryption key, select “No”.

- If the connection has failed, check the encryption key, settings and positions of your access point. And then, follow the on screen instructions.

- If connection to the access point is successful, we recommend you perform the “Connection Test” to confirm connection to the internet has been made. The “Connection Test” can be found in the Network Setup menu (p. 84).

Exit to go to the next step (OK)

(continued to the next page)

Auto Setup

4 Input Owner ID

Please enter your own choice of PIN number, name, etc. to help the police to crack crime.

- Make a note of the PIN number in case you forget it. The PIN number cannot be reset.
- You can input or change the Owner ID later. ➔ “Owner ID” (p. 61)
- To skip this step ➔ 
- This step will be skipped in the Auto Setup after “Shipping Condition” (p. 55) is performed.

■ How to input Owner ID

① Enter the PIN number (4 digits)

- Enter the PIN number twice at first setting.

② Enter your name, house number, and postcode, in that order

Select the item (NAME / HOUSE NO / POSTCODE)

Set characters one by one

- You can set characters by using numeric buttons.
➔ “Characters table for numeric buttons” (p. 101)

Return to select other items

- Select the next item and repeat the operations.

③ Exit to go to next step

(continued to the next page)

5

Select "Home"

Select "Home" viewing environment (highlight "Home" in yellow) to use in your home environment.

Auto Setup is now complete and your TV is ready for viewing.

- To check channel list at-a-glance
➔ "Using TV Guide" (p. 20)
- To edit or hide (skip) channels
➔ "Tuning and Editing Channels" (p. 46 - 51)
- If tuning has failed, check the connection of the Satellite cable, RF cable, and then, follow the on screen instructions.

■ "Shop" viewing environment (for shop display only)

"Shop" viewing environment is the demonstration mode to explain main features of this TV.

Select "Home" viewing environment to use in your home environment.

- You can return to viewing environment selection screen at the stage of Shop confirmation screen and Automatic Demo Off / On selection screen.

① Return to viewing environment selection screen

② Select "Home"

Auto Setup is complete

- To change viewing environment later on, you will need to initialise all settings by accessing Shipping Condition.
➔ "Shipping Condition" (p. 55)

Note

- If tuning has failed or to retune all channels ➔ "Auto Setup" (p. 44 and p. 45)
- If you wish to tune in other satellite channels ➔ "Auto Setup" in "Other Sat. Tuning Menu" (p. 53)
- To re-initialise all settings ➔ "Shipping Condition" (p. 49)
- If you turned the TV Off during Standby mode last time, the TV will be in Standby mode when you turn the TV On with Mains power On / Off switch.

If you connect the Wireless LAN Adaptor later on, the confirmation screen will be displayed for the setup.

- To setup the Wireless LAN connection ➔ p. 76 and p. 77

Watching TV

1 Turn power on
 (Press for about 1 second)
 • Mains power On / Off switch should be On. (p. 9)

2 Select the mode (freesat, DVB, Analogue or Other Sat.)
 →   ② watch
 ① select
 • Displayed if Other Satellite channels are tuned (p. 53)

• Also possible by pressing the TV button repeatedly on the remote control or side panel of the TV. (p. 9)

Information banner appears whenever you select a channel
 • For details → p. 17

3 Select a channel
 up or down
 or 

freesat channel position numbers run in the ranges 100 - 999 and 0100 - 0999.

• To select a three-digit channel position number, e.g. 133

→  →  → 

• To select a four-digit channel position number, e.g. 0246

→  →  →  → 

DVB and Other Sat. channel position numbers run from 1 onwards.

Analogue channel position numbers run in the ranges 0 - 99.

• To select a two or three-digit channel position number, e.g. 39

Watching TV

Other useful functions

Display subtitles

- Subtitles may not be displayed properly in 3D images.

■ freesat, DVB or Other Sat. mode

Display / hide subtitles (if available)

- To change the language for DVB (if available)
 - ➔ “Preferred Subtitles” (p. 39)

■ Analogue mode

Display subtitles

- To hide subtitles ➔

Note

- This is the same as switching to Analogue teletext service and selecting “P888” (subtitle service). (p. 27)
- You cannot change the channel when this function is active.

Aspect

Change the aspect ratio (image size)

Enjoy viewing the image at its optimum size and aspect.

Programmes usually contain an Aspect Control Signal (Widescreen signal, etc.), and the TV will choose the aspect ratio automatically according to the Aspect Control Signal (p. 100).

■ If you would like to change the aspect ratio manually

Display Aspect Selection list

While the list is displayed, select the mode

Aspect Selection list

- To change the mode using the ASPECT button only
 - ➔ (Press repeatedly until you reach the desired mode)

Auto

The best ratio is chosen and the image expanded to fill the screen.
For details ➔ p. 100

16:9

Directly displays the image at 16:9 without distortion (anamorphic).

Zoom1

Displays a 16:9 letterbox or 4:3 image without distortion.

14:9

Displays the image at the standard 14:9 without distortion.

Zoom2

Displays a 16:9 letterbox (anamorphic) image full-screen without distortion.

4:3

Displays the image at the standard 4:3 without distortion.

Zoom3

Displays a 2.35:1 letterbox (anamorphic) image full-screen without distortion.
At 16:9, displays the image at its maximum (with slight enlargement).

Note

- Aspect is fixed to “16:9” when “Viewing Mode” is set to “Game” in the Picture Menu.
- Only “16:9” and “4:3” are available in PC input mode.
- Aspect cannot be changed in teletext service and 3D mode (aspect is fixed to “16:9” when “Signal Format” is set to “2D→3D”).
- Aspect mode can be memorized separately for SD (Standard definition) and HD (High definition) signals.

Other useful functions

Display the selectable settings for the current status

Check or change the current status instantly

OPTION

● To change

Multi Audio / AD (freesat mode)

Allows you to select between alternative language or Audio Description for sound tracks (if available)

- Set Audio Description "Auto" in the Sound Menu (p. 37) to select the audio description sound track. In freesat mode, Audio Description cannot be controlled separately from the audio description sound track.
- This setting is not memorized and it will return to the default setting once you exit the current programme.

Multi Audio (DVB or Other Sat. mode)

Allows you to select between alternative language for sound tracks (if available)

- This setting is not memorized and it will return to the default setting once you exit the current programme.

Monaural Audio (DVB mode)

Allows you to select stereo / monaural (if available)

- This setting is not memorized and it will return to the default setting once you exit the current programme.

Subtitle Language

(freesat, DVB or Other Sat. mode)

Allows you to select the language in which subtitles should appear (if available)

- This setting is not memorized and it will return to the default setting once you exit the current programme.

NICAM (Analogue mode)

Switches NICAM sound (if available)

➔ Sound Menu (p. 37)

Volume Correction

Adjusts volume of individual channel or input mode

Audio Description (DVB mode)

Set to "Auto" if the programme has Audio Description service, then you will hear an additional audio track to describe events on screen

- To adjust the volume for Audio Description ➔ "Audio Description Menu" (p. 37)

Safely remove USB

Takes this operation to remove the connected USB device safely from the TV

Last view

Switch to previously viewed channel or input mode easily

- Press again to return to the present view.

Note

- Switching channel is not available while the recording of Timer Programming, Direct TV Recording or One Touch Recording is in progress.
- Watching less than 10 sec. is not regarded as the previously viewed channel or input mode.

Off Timer

Turn the TV off automatically after a fixed period (Off / 15 / 30 / 45 / 60 / 75 / 90 minutes)

Display the menu

Select "Setup"

Select "Off Timer" and set the time

- To cancel ➔ Set to "Off" or turn the TV off.
- To display the remaining time ➔ Information banner (p. 17)

Note

- When the remaining time is within 3 minutes, the remaining time will flash on the screen.

Using TV Guide

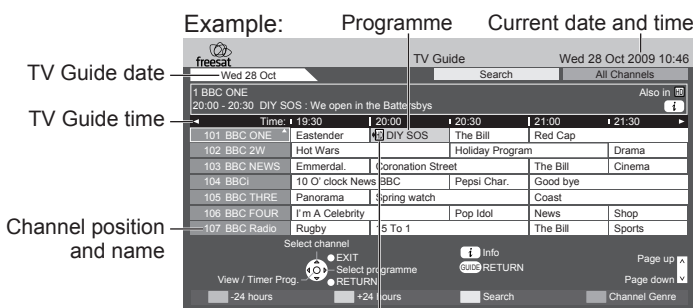

TV Guide—Electronic Programme Guide (EPG) provides an on screen listing of the programmes currently broadcast and the forthcoming broadcasts over the next seven days (depending on the broadcasters).

- When this TV is turned on for the first time, or the TV is switched off for more than a week, it may take some time before the TV Guide is completely shown.

freesat mode

- 1 Select freesat** → p. 16
- 2 Display the Channel Genre selection list**
- 3 Select the genre and view TV Guide**

- There might be some programmes displayed as greyed-out in TV Guide. These are the Off-Air programmes (non-running programmes).

To return to TV

Some programmes may also be broadcast in HD
 ● You can select HD or SD broadcast before viewing or setting Timer Programming.

To watch the programme

Select a current programme or channel

Select "View"

- If a programme exists in both HD and SD broadcasts, the "View Options" screen will be displayed to select HD or SD broadcast.

- To use Timer Programming → p. 22

To view a channel list of the selected genre

To the previous day

To search programme types and view a channel list of the searched programmes

To the next day

To search programme titles and view a list of the searched programmes

Set characters one by one (maximum: 19 characters)

You can set characters by using numeric buttons.

- "Characters table for numeric buttons" (p. 101)

- All the programme titles including the word you set will be listed.
- Searching without any characters will list all programmes including current programmes.

DVB or Analogue mode

- This TV supports the GUIDE Plus+ system.
- The Gemstar branding partner will supply the rating informations in the programme information and the recommended group in the Search list.
- DVB and Analogue channels are displayed on the same TV Guide screen. "D" means DVB channel and "A" means Analogue channel. There will be no programme listings for Analogue channels.

1 Select DVB or Analogue
→ p. 16

2 View TV Guide

Example: TV Guide screen showing current date and time, programme listings, and Gemstar branding partner logo.

Channel position and name	TV Guide time	Programme	Logo of the Gemstar branding partner

You can set characters by using numeric buttons.

→ "Characters table for numeric buttons" (p. 101)

- All the programme titles including the word you set will be listed.
- Searching without any characters will list all programmes including current programmes.

Using TV Guide

Other useful functions

Timer Programming (freesat or DVB mode)

Timer Programming can remind you to watch a programme or record one on an external recorder or a USB HDD.

Select the forthcoming programme

Select the function (Ext Rec., USB HDD Rec. or Reminder)

Timer Programming					
Wed 28 Oct 2009 10:46					
Function	No.	Channel Name	Date	Start	End
Ext Rec.	1	BBC ONE DIY SOS	Wed 28 Oct	20:00	20:30 (30 min.)
...
...
...

(Timer Programming screen)

Ext Rec. / USB HDD Rec. : to record the programme to the external recorder (Ext Rec.) or the USB HDD (USB HDD Rec.)

When the start time comes, the channel will be switched automatically and the video and audio signals will be output. 2 mins. before the starting time, a reminder message appears if you are watching TV.

Reminder : to remind you to watch the programme

When you are watching TV, a reminder message appears 2 mins. before the start time. Press the OK button to switch to the programmed channel.

■ To check / change / cancel a timer programming event → “Timer Programming” (p. 57)

■ To return to TV Guide →

■ If you select a current programme

A confirmation screen asking whether you wish to watch or record the programme will appear. Select “Timer Programming” and set “Ext Rec.” or “USB HDD Rec.” to record from the time you finish programming the timer event setting.

■ If a programme exists in both HD and SD broadcasts

The “Timer Options” screen will be displayed to select HD or SD broadcast.

Timer Options				
DIY SOS				
101	BBC ONE	19:30-20:00	Wed 28 Oct 2009	
119	BBC HD	19:30-20:00	Wed 28 Oct 2009	

Timer Programming					
Wed 28 Oct 2009 10:46					
Function	No.	Channel Name	Date	Start	End
Ext Rec.	1	BBC ONE DIY SOS	Wed 28 Oct	20:00	20:30 (30 min.)
...
...
...

(Timer Programming screen)

“HD” will be displayed if HD broadcast is set.

Note

- This function is not available in Analogue mode.
- Timer Programming can store up to 15 events.
- Timer Programming reminder messages will remain displayed until one of the following occurs:
 - You press the OK button to view the programme or the EXIT button to cancel the reminder.
 - The timer programming event that the reminder is set for ends.
- No other channel can be selected while the recording of Timer Programming is in progress.
- When recording programmes, be sure to make the proper settings on the recorder connected to the TV. If a compatible recorder with Q-Link or similar technologies is connected to the TV (p. 92) and the “Link Settings” (p. 38) are completed, no setting of the recorder is required. Also read the manual of the recorder.
- When recording programmes to the USB HDD, be sure to register the USB HDD and enable it for recording in the “USB HDD Setup” (p. 68).

Guide link programming (Timer Programming from the TV Guide signal)

Guide link programming is Timer Programming which is controlled by information from the TV Guide; if programme start and end times are changed by the broadcaster, the timer programming event will follow the change.

A Split Programme programming is a Guide link programming which is interrupted by one or more other programmes.

Note that Guide link programming (including Split Programme programming) only works reliably if correct information is received from broadcasters.

Timer Programming		Wed 28 Oct 2009 10:46		
Function	No.	Channel Name	Date	Start End
Ext Rec.	1	BBC ONE DIY SOS	Wed 28 Oct	20:00 20:30 (30 min.)
Reminder	14	E4 The Bill	Wed 28 Oct	21:00 22:30 (90 min.)
Ext Rec.	72	BBC 2W <TIMER>	Wed 28 Oct	22:45 23:00 (15 min.)
Ext Rec.	1	BBC ONE Red Cap	Thu 29 Oct	10:30 11:30 (60 min.)
---	---	---	---	---

(Timer Programming screen)

“Guide” is displayed if the timer is set from the TV Guide (Guide link programming)

“S/P” is displayed if the timer is set from the TV Guide and the programme is a Split Programme

“D” or “E” will be displayed in the TV Guide if Timer Programming is set as the Guide link programming.

Note

- If you edit the start time or end time of a Guide link programming event by more than 10 minutes, it will no longer follow the broadcaster’s changes to the start or end time. The start and end times will become fixed.
- Whilst making the Split Programme programming event for Ext Rec. or USB HDD Rec., you cannot record any channels between the interrupted programmes.
- The Split Programme programming event for Reminder will be cleared by pressing the OK button once to view.
- The Split Programme programming event for Reminder will switch to the programmed channel by pressing the OK button even if it is between the interrupted programmes.
- The Split Programme programming does not work if the separated parts are broadcast on different channels.

View details of the programme (freesat or DVB mode)

Select the programme

View details

Details

- Press again to return to TV Guide.

View advertisement (DVB or Analogue mode)

Enter your postcode when using this function for the first time

➔ “Postcode” in “GUIDE Plus+ Settings” (p. 40)

If you have already entered your postcode in “Auto Setup” - when first using the TV (p. 12), you do not have to enter it again.

If you enter an incorrect postcode for your area, or no postcode is entered, advertisements may not be displayed correctly.

Display advertisement information

OPTION

- To display the latest advertisement, you will need to update the information. To update the information continuously, the TV must be left in Standby mode at night.

■ To change advertisements ➔

■ To return to TV Guide ➔

Note

- Some advertisements are for future programmes. In this case it is possible to use the Guide link programming function (above).
- The advertisements displayed on the TV Guide are sent from the GUIDE Plus+ system so that they cannot be deleted manually or will not be lost even when the TV is turned Off with Mains power On / Off switch.

Using TV Guide

Other Sat. mode

In Other Sat. mode, TV Guide is not available. In stead, Channel List will appear.

Panasonic
TV

■ To return to TV

Viewing Teletext

You can enjoy news, weather forecasts and subtitles, etc. (depending on the broadcaster)

- The availability of teletext services for a programme is indicated by "TEXT" in the information banner.

Information banner (p. 17)

Displayed if programme has teletext service

Digital teletext (MHEG)

Digital teletext services

Digital teletext services differ greatly from analogue teletext.

When you switch to a digital teletext service, the images you see can contain graphics and text, laid out and controlled in a manner decided by the broadcaster.

1 Select freesat or DVB

→ p. 16

- freesat and DVB programmes have digital teletext services (MHEG).

2 Switch to Teletext

3 How to use

In all cases, it is possible to navigate the pages using buttons on the remote control, but because the commands available must apply to all manufacturers of digital equipment, some on screen commands may not correspond exactly to the remote control buttons.

For example:

- When "select" or "go" is displayed →

- When "◀", "▶", "▲", "▼" symbol is displayed →

- When "back key" is displayed →

- When the key words are displayed on colour bar →

- When options with numbers are displayed →

- To return to TV →

Note

- As soon as you switch to a digital channel with links to a teletext service, software is downloaded in the background to enable the teletext function. This means that when switching to a digital channel, you should wait for approximately 5 seconds before pressing the TEXT button - this will allow the software to download. If you press the TEXT button before download is complete, it will be ignored and you will have to press the TEXT button again when the download is complete.
- While navigating digital teletext, you will find there is a short delay when moving between pages while the page downloads. There is often a prompt shown somewhere on the page (for example "Loading") to let you know that this is happening.

Viewing Teletext

Analogue teletext

Analogue teletext services

Analogue teletext services are the text information provided by the broadcasters. The features may vary depending on the broadcasters.

What is FASTEXT mode?

In FASTEXT mode, four differently coloured subjects are situated at the bottom of the screen. To access more information about one of these subjects, press the appropriately coloured button. This facility enables fast access to information on the subjects shown.

What is List mode?

In List mode, four differently coloured page numbers are situated at the bottom of the screen. Each of these numbers can be altered and stored in the TV's memory. ("Store frequently viewed pages", p. 27)

■ **To change mode** → "Teletext" in the Setup Menu (p. 39)

1 Select Analogue or Other Sat.
→ p. 16
TV

- Other Sat. programmes are digital broadcasts. The operations of the teletext services, however, are equal to Analogue teletext service.

2 Switch to Teletext
TEXT

- Displays the index page (content varies depending on the broadcasters)

- If the above information is permanently displayed on the top left of the screen, press the button to clear.

Operating the equipment with the TV remote control

The Panasonic equipment connected to the TV can be directly operated with the below buttons of this TV remote control.

	Selection Switch for operating the connected equipment Select "DVD/VCR" to operate Panasonic DVD Recorder, DVD Player, Player theatre, Blu-ray Disc theatre or VCR ➔ "How to change the code for the type of the equipment" (see below) Select "TV" to use USB HDD Recording, Media Player or VIERA Link ➔ "USB HDD Recording" (p. 70) ➔ "Media Player" (p. 76) ➔ "VIERA Link Control" (p. 96)
	Standby Set to Standby mode / Turn on
	Play Playback videocassette / DVD / video content
	Stop Stop the operations
	Rewind / Skip / Search VCR: Rewind, view the picture rapidly in reverse DVD / video content: Skip to the previous track or title (not available for the operation of USB HDD Recording) Press and hold to search backward
	Fast-forward / Skip / Search VCR: Fast-forward, view the picture rapidly forward DVD / video content: Skip to the next track or title (not available for the operation of USB HDD Recording) Press and hold to search forward
	Pause Pause / Resume DVD: Press and hold to play at slow speed
	Channel Up / Down Select channel
	Record Start recording

■ How to change the code for the type of the equipment

Each type of the Panasonic equipment has its own remote control code. Please change the code according to the equipment you want to operate.

- ① Set the position to "DVD/VCR"
- ② Press and hold during the following operations

Enter the appropriate code, ➔ Press

Type of the equipment	Code
DVD Recorder, DVD Player	70 (default)
Player theatre, Blu-ray Disc theatre	71
VCR	72

Note

- Confirm if the remote control works correctly after changing the code.
- The codes may be reset to default values if batteries are replaced.
- Some operations may not be possible on some equipment models.

Viewing 3D images

To view 3D contents or programmes in 3D effect (3 Dimensional) you must wear the 3D Eyewear (optional accessory → p.6).

● For using and wearing the 3D Eyewear please read the manual of the 3D Eyewear.

This TV supports “Frame Sequential*1”, “Side by Side*2” and “Top and Bottom*3” 3D formats.

*1: The 3D format that the images for the left and right eyes are recorded with the high definition quality and alternately played back

*2, *3: Other available 3D formats

● How to view the 3D images → p. 31

To enjoy 3D images safely and comfortably, please read these instructions fully.

Warning

■ Take care

To help avoid risk of fire, damage, injury or discomfort, please follow the warnings below:

● Pay special attention when children are using the 3D Eyewear.

The 3D Eyewear should not be used by children younger than 5 - 6 years old, as a guideline.

All children must be fully supervised by parents or guardians to ensure their safety and health while using the 3D Eyewear.

● Do not use the 3D Eyewear if you have a history of over-sensitivity to light, heart problems, or have any other existing medical conditions.

Caution

■ Placement and conditions for viewing 3D images

● Do not use the 3D Eyewear near the devices or objects that emit infrared (ex. remote control, fireplace, stove, etc.), as this may cause the 3D Eyewear to mis-operate.

● Do not use devices (such as mobile phones or personal transceivers) that emit strong electromagnetic waves near the 3D Eyewear as this may cause the 3D Eyewear to malfunction.

● Do not use the 3D Eyewear at a distance less than the recommended distance.

The recommended viewing distance is 3 times of image height (2.4 m or more).

When the top and bottom area of the screen is blackened, such as movies, view the screen at a distance

3 times further than the height of the actual image. (That makes the distance closer than above recommended figure.)

● Do not use the 3D Eyewear in the condition of high temperature.

■ Handling the 3D Eyewear

● Do not drop, exert pressure on, or step on the 3D Eyewear.

● Be careful of the tips of the frame when putting on the 3D Eyewear.

● Be careful not to trap a finger in the hinge section of the 3D Eyewear.

● Do not use the 3D Eyewear if it is physically damaged.

● The 3D Eyewear must only be worn when viewing 3D content.

■ Viewing 3D Content

● Ensure no breakable objects are nearby to avoid any accidental damage or injury.

● Be careful not to strike the TV screen or other people unintentionally. When using the 3D Eyewear the distance between the user and screen can be misjudged.

● Remove the 3D Eyewear before moving around to avoid falling or accidental injury.

■ If having eyestrain or discomfort, etc.

● Stop using the 3D Eyewear immediately, if you feel tired, are not feeling well or experience any discomfort.

● Stop using the 3D Eyewear if you can clearly see double images when viewing 3D content.

● After viewing 3D contents or playing 3D games, take a short break to readjust your senses.

■ Stopping the usage of the 3D Eyewear

● Stop using the 3D Eyewear immediately if a malfunction or fault occurs, or if you experience any redness, pain, or skin irritation around the nose or temples.

● In rare cases, the materials used in the 3D Eyewear may cause an allergic reaction.

Note

● Do not use the 3D Eyewear as sunglasses.

● The 3D Eyewear will not work correctly if worn upside down or back-to-front.

● If you suffer from any eyesight problems (short / far-sighted, astigmatism, eyesight differences in left and right), please ensure to correct your vision before using the 3D Eyewear.

● If you do not look toward the TV screen for a while when viewing 3D images, the 3D Eyewear may be turned off automatically.

● 3D effects may be perceived differently depending on the person.

● Always store the 3D Eyewear in the case when not in use.

To view the 3D images

To view the contents of the Frame Sequential format (ex. 3D-compatible Blu-ray Disc, etc.) with 3D effect

Connect the 3D-compatible player via an HDMI cable (p. 11 and p. 98) and playback the contents.

- Use fully wired HDMI compliant cable.
- For the settings of the player, read the manual of the player.
- If input mode is not switched automatically, select the input mode connected to the player (p. 28).
- If you use the non 3D-compatible player, the images will be displayed without 3D effect.

To view the contents or programmes of 3D formats other than Frame Sequential with 3D effect

Select suitable picture format in “Signal Format” (p. 33) before viewing.

- You can view “Side by Side” and “Top and Bottom” with 3D effect even if you use the non 3D-compatible player.
- Please consult the suppliers of contents or programmes for availability of this service.
- You can also view 3D images in photo / video mode in Media player (p. 74 and p. 76 - 77) and video mode in DLNA (p. 87).

To view 2D images with 3D effect

Use a 2D-to-3D conversion function → “2D→3D” mode in “Signal Format” (p. 33)

① Turn the 3D Eyewear on

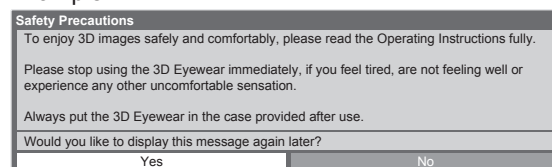

② Supporting the 3D Eyewear

③ View the 3D images

- Safety precautions will be displayed when you first watch the 3D image. Select “Yes” or “No” to continue to view 3D images.

If you select “Yes”, this message will be displayed again in the same condition after Mains power On / Off switch is next turned On. Select “No” if you do not wish to display this message again.

Example:

■ After using the 3D Eyewear, please turn off the 3D Eyewear.

Note

- 3D Eyewear is not included. Please purchase as necessary. (p. 6)
- For more detail about using and wearing the 3D Eyewear, please refer to the manual of the 3D Eyewear.
- The 3D image or 3D effect may not be available while VIERA CAST home screen (p. 89) is displayed or Ext Rec. of Timer Programming (p. 56) / Direct TV Recording (p. 92 and p. 94) is in progress. As for the contents of the Frame Sequential format, no images will be displayed in these conditions.
- If the room is lit by using fluorescent lights / dimmers (50 Hz) and light appears to flicker when using the 3D Eyewear, switch off or dim the light.
- Liquid crystal displays (such as computer screens, digital clocks or calculators, etc.) may be difficult to see while wearing the 3D Eyewear.

Coverage area / range for 3D viewing

If the 3D Eyewear is placed outside the coverage area for about 5 minutes, the 3D Eyewear will be turned off automatically.

- : Coverage area for using the 3D Eyewear

View from the top

View from the side

Note

- You cannot view the 3D images with the 3D Eyewear too far from the TV, because of the difficulty of receiving infrared signals from the TV.
- The range may be shortened depending on the obstacles between the infrared sensors on the TV and the 3D Eyewear, the dirt on the infrared sensors or the surrounding environment.
- If you do not look toward the TV screen for a while when viewing 3D images, the 3D Eyewear may be turned off automatically even if in the coverage area.

Viewing 3D images

3D Settings

Change the 3D settings in the Setup Menu if 3D images are not displayed correctly.

1 Display the menu
MENU

2 Select "Setup"

3 Select "3D Settings"

● You can also access 3D Settings menu directly by using VIERA TOOLS.
➔ "How to use VIERA TOOLS" (p. 34)

4 Select one of the following functions and set

■ To return to TV

Picture Display (2D / 3D)

Sets the TV to 3D or 2D mode

- Select "2D" to view 3D picture in 2 dimensional without wearing the 3D Eyewear.

Signal Format (Auto / Side by Side / Top and Bottom / 2D→3D / Original)

Selects 3D picture format to suit the format of the source image

- Depending on the format of the source image, the 3D images will be displayed correctly regardless of the setting of "Signal Format" (when "Picture Display" is set to "3D") : for example, when receiving the Frame Sequential format (ex. playback of the 3D-compatible Blu-ray Disc with the 3D-compatible player) via an HDMI cable.

Auto (default) : 3D images are automatically displayed according to the image.

- This mode may not work properly depending on the source image format. In this case, select the appropriate picture format.

Side by Side /

Top and Bottom : One of the formats of the 3D standard

- Select these formats as necessary.
- Not valid on Analogue and AV mode

2D→3D : Converts 2D images into 3D

- Picture aspect is fixed to 16:9 regardless of the original aspect.
- For freesat, DVB, Other Sat., Analogue, AV, Component, HDMI, Media Player (photo and video) and Media Server (video).
- On-screen displays are also seen in 3D in this mode.
- Please note the 3D images appear slightly different from the originals.
- Using this function for profit-making purposes, or publically showing images converted from 2D to 3D in places such as shops or hotels etc. may infringe on the rights of the copyright holder protected under copyright law.

Original : Displays the source image as it is.

- Use to identify the format type of the source image.

Table of images that can be seen for each Signal Format and the source image format

If the picture appears to be abnormal, refer to the table below to choose the correct signal format setting.

Signal Format \ Source image format	Auto	Side by Side	Top and Bottom	2D→3D	Original
Side by side	 *1	 Normal*2		 *2	
Top and bottom	 *1		 Normal*2	 *2	
Normal format (2D)	 Normal			 Normal*2	 Normal

*1 when the source image is not recognized correctly

*2 When "Picture Display" is set to "3D", the images will be displayed with 3D effect. When set to "2D", displayed without 3D effect.

- Depending on the player or broadcasts, the image may be different from the above illustrations.

2D→3D Depth (Min / Mid / Max)

Select a level of 3D-image depth for viewing converted 2D images.

- This function is available when "Signal Format" is set to "2D→3D".

Picture Sequence (Normal / Reverse)

Select "Reverse" if you feel that the sense of depth is unusual.

- Not valid on Analogue or AV mode, or when "Signal Format" is set to "2D→3D".

Edge Smoother (Off / On)

Select "On" if you feel the contoured parts of an image are not smooth enough. (for "Side by Side" or "Top and Bottom" format)

- Not valid on Analogue or AV mode, or when "Signal Format" is set to "2D→3D".

Safety Precautions

Displays the precautions for viewing 3D images.

Note

- These settings will not be memorized when changing the input mode or channel.
- When viewing the 3D-compatible 24p source movie, you can reduce juddering noises by setting "3D 24p Film Display" in "Other Settings" (p. 40).

How to Use VIERA TOOLS

You can access some special features easily by using the VIERA TOOLS function.

- For “VIERA Link Control” and “Pause Live TV” functions to operate correctly, ensure the connections and settings are completed.
 - ➔ “Summary of Q-Link and VIERA Link features” (p. 90 and p. 91), “Preparations” (p. 93)
 - After connection, turn the equipment on and then switch the TV on.
- For “Photo”, “Video” and “Music” functions to operate correctly, ensure the device has photo or video data on it and insert it into the SD Card slot or USB port properly.
 - ➔ “Using Media Player” (p. 72)

1 Display icons of the feature

2 Select a feature

3 Follow the operations of each feature

- VIERA Link Control ➔ “VIERA Link Control” (p. 96)

When two or more compatible equipment are connected, a selection screen will be displayed.
Please select the correct description and access.

- Photo ➔ “Photo mode” (p. 74)

When two or more available devices are connected, a selection screen will be displayed.
Please select the correct description and access.

- Video ➔ “Video mode” (p. 76)

When two or more available devices are connected, a selection screen will be displayed.
Please select the correct description and access.

- Music ➔ “Music mode” (p. 79)

When two or more available devices are connected, a selection screen will be displayed.
Please select the correct description and access.

- 3D ➔ “3D Settings” (p. 32)

- Media Server ➔ “Using DLNA® features” (p. 86)

■ To return to TV

Note

- If the selected feature is not available, the demonstration to explain how to use it can be displayed. Press the OK button to view the demonstration after selecting the unavailable feature.

How to Use Menu Functions

Various menus allow you to make settings for the picture, sound, and other functions.

1 Display the menu
 MENU ● Displays the functions that can be set (varies according to the input signal)

2 Select the menu

 ● access (up/down arrows)
 ● select (left/right arrows)

3 Select the item
 Example (Picture Menu):

 ● select (left/right arrows)

4 Adjust or select
 Example (Picture Menu):

 ● change (left/right arrows)
 ● store or access (Required by some functions) (up/down arrows)

■ **To return to TV at any time**
 EXIT

■ **To return to the previous screen**
 BACK/RETURN

■ **To change menu pages**
 up/down

■ **Choose from among alternatives**

Number and positions of alternatives

 Changed

■ **Adjust using the slide bar**

Moved

■ **Go to the next screen**

Displays the next screen

■ **Enter characters by free input menu**

You can enter names or numbers freely for some items.

Set characters one by one
 ● select (left/right arrows)
 ● set (up/down arrows)
 Store BACK/RETURN

- You can set characters by using numeric buttons.
 ➔ "Characters table for numeric buttons" (p. 101)

Note

- If "Demo Settings" item is displayed in the Setup Menu, the TV is in "Shop" viewing environment. To return to "Home" viewing environment initialise all settings by accessing Shipping Condition. (p. 55)

How to Use Menu Functions

■ Menu list

Menu	Item	Adjustments / Configurations (alternatives)
Picture	Viewing Mode	<p>Basic picture mode (Dynamic / Normal / Cinema / THX (True Cinema) / Game / Photo / Professional1 / Professional2)</p> <p>In each Viewing Mode, Contrast, Brightness, Colour, Sharpness, Tint, Colour Balance, Vivid Colour, C.A.T.S., P-NR and 3D-COMB can be adjusted and stored to suit your particular viewing requirement.</p> <ul style="list-style-type: none"> ● Set for each input signal. <p>Dynamic : Provides enhanced picture contrast and sharpness when viewing in a bright room.</p> <p>Normal : Recommended for viewing under normal ambient room lighting conditions.</p> <p>Cinema : For watching movies in a darkened room with the improved performance of contrast, black and colour reproduction</p> <p>THX (True Cinema) : Precisely reproduces the original quality of the image without any revision. Recommended for playback of THX disc (disc with "THX" logo) THX mode is used to mirror the picture settings used by professional filmmakers, faithfully reproducing the image quality of THX Certified movies.</p> <ul style="list-style-type: none"> ● THX Certified movies have the "THX" logo on a disc. ● "True Cinema" is displayed instead of "THX" in the mode of 3D, PC input, Media Player and Network service operations. <p>Game : Fast response signal specifically to provide suitable images for playing games</p> <ul style="list-style-type: none"> ● Not valid on TV mode ● A continuous record of time spent using Game mode can be displayed in the top right of the screen. ➔ "Playing Time Display" (p. 39) <p>Photo : Set "Reversal Film Effect" to "On" to provide the suitable image quality for photos</p> <ul style="list-style-type: none"> ● For HDMI input, Media Player and Network service operations <p>Professional 1 / 2 : Allows you to set the professional picture settings in "Advanced Settings", "Lock Settings" and "Copy Adjustment" ➔ p. 66</p> <ul style="list-style-type: none"> ● This mode is available only when "Advance(isfcc)" in the Setup Menu is set to "On". ● Not valid on VIERA CAST ● If the certified professional dealer sets these modes, "Professional1" and "Professional2" may be displayed as "isf Day" and "isf Night".
	Contrast, Brightness, Colour, Sharpness	Increases or decreases the levels of these options according to your personal preference
	Tint	With an NTSC signal source connected to the TV, the picture hue can be adjusted to suit your taste
	Colour Balance	Allows you to set the overall colour tone of the picture (Cool / Normal / Warm)
	Vivid Colour	Automatically adjusts colours to vivid ones (Off / On)
	Reversal Film Effect	Provides the picture effect such as the reversal film (Off / On)
	C.A.T.S.	Contrast Automatic Tracking System (Automatic Brightness Control function) Adjusts picture settings automatically dependent on ambient lighting conditions (Off / On)
	P-NR	Picture Noise Reduction Automatically reduces unwanted picture noise and flicker noise in the contoured parts of a picture (Off / Min / Mid / Max)
	3D-COMB	Makes still or slow moving pictures look more vivid (Off / On)
	Picture Display	Turns the screen off when you select "Off" (Off / On)
	Reset to Defaults	Press the OK button to reset the present Picture Viewing Mode to the default settings

Menu	Item	Adjustments / Configurations (alternatives)
Sound	Mode	<p>Selects the basic sound mode (Music / Speech / User)</p> <ul style="list-style-type: none"> ● The selected mode affects all input signals. <p>Music: Improves sound quality for watching music videos, etc. Speech: Improves sound quality for watching news, drama, etc.</p> <ul style="list-style-type: none"> ● Music and Speech modes use CONEQ™ brand equalization technology to improve sound quality. CONEQ equalizes acoustic power frequency response and corrects time and phase alignment errors of a speaker system. Speakers with CONEQ perform as near-perfect electro-acoustic transducers providing true to the original sound with the highest musically and intelligibility. ● In Music and Speech modes, you can adjust “Bass” and “Treble” settings, and those settings will be stored for each mode. <p>User: Adjusts the sounds manually by using the equalizer to suit your favourite sound quality.</p> <ul style="list-style-type: none"> ● For the User mode, “Equalizer” will appear on the Sound Menu instead of “Bass” and “Treble”. Select the “Equalizer” and adjust the frequency. ➔ “Equalizer” (below)
	Bass	Increases or decreases level to enhance or minimise lower, deeper sound output
	Treble	Increases or decreases level to enhance or minimise sharper, higher sound output
	Equalizer	<p>Adjusts the frequency level to suit your favourite sound quality</p> <ul style="list-style-type: none"> ● This function is available when “Mode” is set to “User”. ● Select the frequency and change the frequency level by using the cursor button. ● If you want to enhance the bass sound, raise the level of the lower frequency. If you want to enhance the treble sound, raise the level of the higher frequency. ● To reset the levels of each frequency to the default settings, select the “Reset to Defaults” by using cursor button, and then press the OK button.
	Balance	Adjusts volume level of right and left speakers
	Headphone Volume	Adjusts the volume of the headphones
	Surround	<p>Surround sound settings (Off / V-Audio / V-Audio Surround)</p> <p>V-Audio: Provides a dynamic enhancer of width to simulate improved spatial effects V-Audio Surround: Provides a dynamic enhancer of width and depth to simulate improved spatial effects</p>

- A different menu will be displayed when “Advance(isfcc)” in the Setup Menu is set to “On” or in the mode of PC input, Media Player or Network service operations. (p. 64 - 67, 73 - 79 and p. 88)
- Only available items can be selected.

How to Use Menu Functions

Menu	Item	Adjustments / Configurations (alternatives)	
Setup	3D Settings	Adjusts and sets to view 3D images (p. 32)	
	Timer Programming	Sets a timer to remind watching or record forthcoming programmes (p. 56)	
	Off Timer	Sets the time until the TV automatically goes to Standby mode (Off / 15 / 30 / 45 / 60 / 75 / 90 minutes) (p. 19)	
	USB HDD Setup	Registers the connected USB HDD and makes the settings for the recording (p. 68)	
	Link Settings	VIERA Link	Sets to use VIERA Link functions (Off / On) (p. 93)
		HDMI Content Detection	Adjusts the picture settings according to the content type signal from the connected equipment via HDMI cable (Off / Auto) <ul style="list-style-type: none"> ● This function is available if the connected equipment supports HDMI Content Type. ● The content type information will be displayed for several seconds when this function works.
		Q-Link	Selects which AV terminal is to be used for data communication between this TV and a compatible recorder (AV1 / AV2) (p. 92) <ul style="list-style-type: none"> ● Select the connected terminal to the recorder even it is not compatible with Q-Link.
		AV1 / AV2 out	Chooses the signal to be transmitted from the TV to Q-Link (TV / AV1 / AV2 / AV3 / Monitor) <ul style="list-style-type: none"> ● Monitor: Image displayed on screen ● Component, PC and HDMI signals cannot be outputted.
		Standby Power Save	Controls the power consumption in Standby mode of the connected equipment to reduce the consumption (Off / On) (p. 94) <ul style="list-style-type: none"> ● This function is available when "VIERA Link" is set to "On".
		Intelligent Auto Standby	Makes non-watched or non-used connected equipment go into Standby mode to reduce the power consumption (Off / On (With reminder) / On (No reminder)) (p. 94) <ul style="list-style-type: none"> ● This function is available when "VIERA Link" is set to "On".
		Q-Link Download	Downloads analogue channel information to a Q-Link compatible equipment connected to the TV
	Child Lock	Locks a channel / AV input to prevent access to it (p. 58)	
	Freesat Tuning Menu	Favourites Edit	Creates a list of favourite freesat channels (p. 47)
		Channel List	Skips the unwanted freesat channels (p. 47)
		Auto Setup	Automatically sets the freesat channels received in the area (p. 44)
		Signal Condition	Checks the freesat signal condition (p. 47)
	DVB Tuning Menu	Favourites Edit	Creates a list of favourite DVB channels (p. 49)
		Channel List	Skips the unwanted DVB channels or edits DVB channels (p. 49)
		Auto Setup	Automatically sets the DVB channels received in the area (p. 45)
		Channel Sorting by Region	Automatically sorts tuned channels according to the available region (p. 48)
		Manual Tuning	Sets the DVB channels manually (p. 48)
Update Channel List		Updates DVB Channel List while keeping your settings (p. 50)	
New Channel Message		Selects whether to give a notification message when a new DVB channel is found (Off / On) (p. 50)	
Signal Condition	Checks the DVB signal condition (p. 50)		

Menu	Item	Adjustments / Configurations (alternatives)	
Setup	Analogue Tuning Menu	Channel List	Skips the unwanted Analogue channels or edits Analogue channels (p. 51)
		Auto Setup	Automatically sets the Analogue channels received in the area (p. 45)
		Manual Tuning	Sets the Analogue channels manually (p. 51)
	Other Sat. Tuning Menu	Favourites Edit	Creates a list of favourite Other Satellite channels (p. 54)
		Channel List	Skips the unwanted Other Satellite channels or edits Other Satellite channels (p. 54)
		Auto Setup	Automatically sets the Other Satellite channels received in the area (p. 53)
		Manual Tuning	Sets the Other Satellite channels manually (p. 52) ● Please consult the received satellite broadcasting companies for the setting.
		Add New Channels	Adds new Other Satellite channels to Channel List (p. 53)
		Signal Condition	Checks the condition of Other Satellite signals (p. 52)
	Display Settings	Teletext	Analogue teletext display mode (FASTEXT / List) (p. 26)
		Preferred Subtitles	Selects the preferred language for digital channel subtitles (depending on the broadcaster) (English / Welsh / Gaelic) ● To display subtitles → p. 18
		Side Panel	Increases the brightness of the side panel (Off / Low / Mid / High) ● The recommended setting is “High” to prevent panel “image retention”.
		Input Labels	Labels or skips each input terminal (p. 60)
		Banner Display Timeout	Sets how long the Information banner (p. 17) stays on screen (0 (No display) / 1 / 2 / 3 / 4 / 5 / 6 / 7 / 8 / 9 / 10 seconds)
		Playing Time Display	Set to “On” to display a continuous record of time spent using Game mode every 30 mins (Off / On) ● This function is available when “Game” is selected in “Viewing Mode” (p. 36).
		Radio Mode	Sets the timer for turning off the screen automatically when a radio channel is selected (Off / 5 / 10 / 15 / 20 seconds) ● The sound is active even if the screen turns off. ● Press any buttons except Volume Up / Down and Sound Mute buttons to turn the screen on. ● This function is effective in reducing power consumption when listening to a radio channel.
		Network Setup	Sets the network setting to use in your network environment (p. 82)
		DivX® VOD	Displays DivX VOD registration code (p. 101)
		Advance(isfcc)	Enables the advanced picture settings (Off / On) ● Set to “On” to enable the mode of “Professional1” and “Professional2” in “Viewing Mode”. ● Set to “On” to display the advanced items in the Picture Menu - “Advanced Settings”, “Lock Settings” and “Copy Adjustment”. “Copy Adjustment” will be displayed when “Viewing Mode” is set to “Professional1” or “Professional2”. ● “isfcc” is the picture setting for the certified professional dealer. For details, consult your local dealer.

- A different menu will be displayed when “Advance(isfcc)” in the Setup Menu is set to “On” or in the mode of PC input, Media Player or Network service operations. (p. 64 - 67, 73 - 79 and p. 88)
- Only available items can be selected.

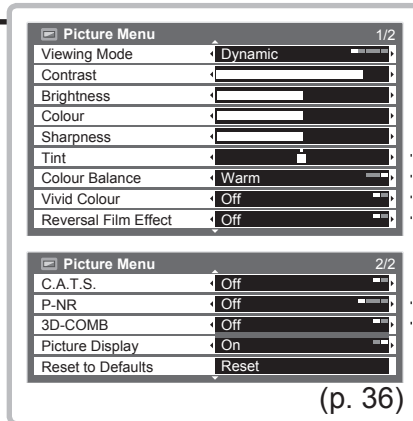

How to Use Menu Functions

Menu	Item	Adjustments / Configurations (alternatives)	
Setup	System Menu	USB Keyboard Layout Selects the language that your USB Keyboard supports ● Use a USB Keyboard to enter characters in VIERA CAST (p. 89). ● Characters may not be displayed correctly on the TV screen depending on the connected keyboard or the keyboard layout setting.	
		Shipping Condition Resets all settings, for example, when moving house (p. 55)	
		Owner ID Inputs the owner ID (p. 61)	
		Common Interface Uses include to watch pay-TV (p. 62)	
		System Update Downloads new software to TV (p. 63)	
		Software Licence Displays the software licence information	
		System Information Displays the system information of this TV	
	Other Settings	GUIDE Plus+ Settings	Postcode Sets your postcode to display advertisements in the GUIDE Plus+ system (p. 23)
			System Information Displays the system information of the GUIDE Plus+ system
		Intelligent Frame Creation Automatically compensates the picture frame rate and removes juddering movements to make the images smooth and clear (Off / On) ● This function is not available for selection (default to "Off") when "Viewing Mode" is set to "Game" or in the mode of 3D, PC input, photo or Network service operations.	
		24p Smooth Film Automatically compensates the picture frame rate to make the 24p source movie images smooth (Off / On) ● This is available only for 24p signal input and displayed instead of "Intelligent Frame Creation". ● This function is not available for selection (default to "Off") when "Viewing Mode" is set to "Game", when "Signal Format" is set to "2D→3D" in "3D Settings" or in the mode of PC input, photo or Network service operations.	
		3D 24p Film Display Reduces juddering noises of the 3D images (Off / On) ● Set to "On" for the cinema-like images. ● This function is available for the 3D-compatible 24p source movie.	
		Resolution Enhancer Enhances the picture resolution to make the image sharper (Off / Mid / Max) ● This function is available for SD (Standard definition) signal. ● As for HD (High definition) signal, this function is available when aspect mode is set to 16:9 (16:9 Overscan is set to "On") or Zoom. ● Not valid on 3D, PC, VIERA CAST and Media Player	
		Power on Preference Automatically selects the input when the TV is turned on (TV / AV) Set to "TV" to view picture from TV tuner. Set to "AV" to view input from an external equipment connected to a SCART terminal, e.g. cable TV box. ● The external equipment must be switched on and sending a control signal for automatic switching at power on to occur.	
Power on Channel List Automatically selects All Channels or Favourites list in the Information banner (p. 17) when the TV is turned on (All Channel List / Last) Set to "All Channel List" to display all the channels. Set to "Last" to display the one you selected last time. ● Not available on freesat or analogue mode			
Auto Standby Sets the time the TV automatically goes to Standby mode when no operation is performed for the selected times (Off / 2 / 4 hours) ● Starting Timer Programming automatically does not affect this function. ● Automatic input switching with the connected equipment affects this function and time-count will be reset. ● The notification message will appear 3 minutes before going to Standby mode.			
Power Save Reduces brightness of picture to economise on power consumption (Off / On)			
16:9 Overscan Selects the screen area displaying the image (Off / On) On : Enlarges the image to hide the edge of the image. Off : Displays the image in the original size. ● Set to "On" if noise is generated on the edge of the screen. ● This function is available when aspect is set to Auto (16:9 signal only) or 16:9. ● This function can be memorized separately for SD (Standard definition) and HD (High definition) signals.			
DVI Input Setting Changes the black level in the image for HDMI input mode with DVI input signal manually (Normal / Full) ● When the DVI input signal from the external equipment, especially from PC, is displayed, the black level may not be suitable. In this case, select "Full". ● The black level for HDMI input signal will be adjusted automatically. ● For HDMI input mode with DVI input signal only			

- A different menu will be displayed when "Advance(isfccc)" in the Setup Menu is set to "On" or in the mode of PC input, Media Player or Network service operations. (p. 64 - 67, 73 - 79 and p. 88)
- Only available items can be selected.

Retuning from Setup Menu

Auto Setup retunes all channels automatically.

freesat channels

Automatically retune all the freesat channels received in the area.

- Only freesat channels are retuned.
- All the previous tuning settings (Favourites Edit and Channel List, etc.) are erased.
- If a Child Lock PIN number (p. 58) has been set, it must be entered.

- 1 Select freesat**
→ p. 16

- 2 Display the menu**

- 3 Select "Setup"**

- 4 Select "freesat Tuning Menu"**

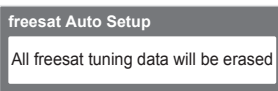

■ To return to TV

- 5 Select "Auto Setup"**

- 6 Start Auto Setup**
 → 
Settings are made automatically

- 7 Enter your postcode**

Set characters one by one → 

Your postcode is required to receive local services and sort the channel order. Please ensure to include a space when entering your postcode.

- You can set characters by using numeric buttons.
→ "Characters table for numeric buttons" (p. 101)

When the operation is completed, the channel at the lowest position will be displayed.

■ For Auto Setup, using the buttons on the side panel of the TV (p. 9)

- ① Press repeatedly until "Auto Setup" appears

F 

- ② Access "Auto Setup"

TV 

- ③ Start "Auto Setup"

TV 

- To return to TV → F 

Note

- You cannot set the postcode in this operation. The previous postcode setting is not erased.

DVB or Analogue channels

Automatically retune all DVB or Analogue channels received in the area.

- Only DVB channels are retuned in DVB mode.
- Only Analogue channels are retuned in Analogue mode.
- All the previous tuning settings (Channel List, etc.) are erased.
- If a Child Lock PIN number (p. 58) has been set, it must be entered.

1 Select DVB or Analogue

→ p. 16

2 Display the menu

MENU

3 Select "Setup"

List favourite freesat channels **Favourites Edit**

Create your favourite channel list from various broadcasters.
The freesat Favourites list is available from "Channel Genre" in the TV Guide (p. 20).

① Select a channel to list

② Add it to the Favourites list

■ To edit Favourites list

- To delete the channel →
- To delete all channels →

Note

- Channel position numbers (known as logical channel numbers) cannot be changed, due to broadcast restrictions.

③ Store

Skip unwanted freesat channels **Channel List**

You can hide unwanted freesat channels.
The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

Select a channel and reveal / hide

Check freesat signal **Signal Condition**

Selects a channel and checks the freesat signal condition.

- To change the channel →

freesat Signal Condition	
Channel Name	101 BBC 1 Wales
Signal Quality	0 10
Signal Strength	0 10
Bit Error Rate	0.00E+00
Satellite	Astra 28.2° E
Parameter	10847MHz, V, 22000kS/s

A good Signal Strength is not an indication of best signal for freesat reception. Please use the Signal Quality indicator as follows:

Signal Quality:

- Green bar → Good
- Yellow bar → Poor
- Red bar → Bad (Check the Satellite dish)

Tuning and Editing Channels

(DVB)

You can retune channels or make your favourite channel lists, skip unwanted channels, etc.

- 1 Select DVB**
→ p. 16
- 2 Display the menu**
- 3 Select "Setup"**
- 4 Select "DVB Tuning Menu"**
- 5 Select one of the following functions**

● Auto Setup
→ "Retuning from Setup Menu" (p. 45)

6 Set

Sort DVB channels according to the region **Channel Sorting by Region**

You can sort DVB channels so that those with the best signal quality, or those for your preferred region, appear nearer the top of your Channel List.

Normally, you should select "Best signal quality (All Regions)".

(select repeatedly until you reach the available region)

● If you choose to select your preferred region, you could find channels with a weaker signal appear nearer the top of your Channel List. If you have any image or sound problems, select "Best signal quality (All Regions)" instead.

Set DVB channel manually **Manual Tuning**

Normally use "Auto Setup" or "Update Channel List" to retune DVB channels.

If tuning has not been done completely or for adjusting the direction of the aerial, use this function.

● All channels found will be added to the Channel List.

List favourite DVB channels **Favourites Edit**

Create your favourite channel lists from various broadcasters (up to 4: Favourites1 to 4). The DVB Favourites lists are available for switching in the Information banner (p. 17) and from "Category" in the TV Guide (p. 21).

① Select a channel to list

select

To display other Favourites → green

② Add it to the Favourites list

A channel is added

To add all channels to the list → yellow

To edit Favourites list

Select the field of Favourites to edit and:

To delete a channel → Select the channel → OK

To delete all channels → yellow

To name the Favourites → red → Set characters one by one (maximum: ten characters)

Store BACK/RETURN

You can set characters by using numeric buttons.

→ "Characters table for numeric buttons" (p. 101)

To move the channel → green → Select the new position → OK → Confirm green

or

Select the turn

③ Store

Note

- Channel position numbers (known as logical channel numbers) can be swapped in Channel List. To swap the channel position number → "Channel List" (below)

Skip unwanted DVB channels, Edit DVB Channels **Channel List**

You can hide unwanted DVB channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

Select a channel and reveal / hide

② reveal / hide

① select

: reveal
 : hide (skip)

To reveal all channels

To edit channels

You can also edit each channel in Channel List.

Select a channel to edit and:

To retune each channel - Manual Tuning (p. 48) (only for the revealed channels) → red

To swap the channel position number → green → Enter the new position number → Store green

Tuning and Editing Channels

Update DVB channel automatically **Update Channel List**

You can add new channels, delete removed channels, update channel name and position automatically to Channel List.

- Channel List is updated while keeping your settings in Favourites Edit, Channel List, Child Lock, Timer Programming, etc.

Display a notification message **New Channel Message**

Selects whether to give a notification message when a new DVB channel is found. (**Off / On**)

New channels found!
Press OK to update channel list.
Press EXIT to ignore.

- Selecting OK will perform "Update Channel List".

Check DVB signal **Signal Condition**

Selects a channel and checks the DVB signal condition.

- To change the channel →

DVB Signal Condition	
Channel Name	70 CBBC Channel
Signal Quality	0
Signal Strength	0
Bit Error Rate	0.00E+00
Network Name	Wenvoe
Parameter	[CH62] 802 MHz

A good Signal Strength is not an indication of best signal for DVB reception. Please use the Signal Quality indicator as follows:

Signal Quality:

Tuning and Editing Channels

(Other Sat.)

You can tune all receivable digital satellite channels or skip unwanted channels, etc.

● Some of Other Sat. functions may work to differing specifications (depending on the broadcasters).

1 Select freesat or Other Sat.

→ p. 16

2 Display the menu

MENU

3 Select "Setup"

② access

① select

4 Select "Other Sat. Tuning Menu"

② access

① select

5 Select one of the following functions

② access

① select

■ To return to TV

EXIT

6 Set

Set Other Sat. channel manually **Manual Tuning**

Normally use "Auto Setup" or "Add New Channels" to tune Other Sat. channels.

● Set tuning parameters for the required satellite, details can usually be found in a satellite TV magazine.

Check Other Sat. signal **Signal Condition**

Selects a channel and checks the Other Sat. signal condition.

● To change the channel →

A good Signal Strength is not an indication of best signal for Other Sat. reception. Please use the Signal Quality indicator as follows:

Signal Quality:

- Green bar → Good
- Yellow bar → Poor
- Red bar → Bad (Check the Satellite dish)

Set all receivable digital satellite channels **Auto Setup**

Any receivable digital compliant satellite channels can be tuned.

- Only Other Sat. channels are returned.
- All the previous tuning settings are erased.
- If a Child Lock PIN number (p. 58) has been set, it must be entered.

① Select the satellite

- Selectable satellites are Astra2/Eurobird, Astra1 and Hotbird.
Check the dish alignment for the satellite you want to select
 - Astra2/Eurobird → p. 10
 - Astra1, Hotbird → Please consult the received satellite broadcasting companies.
- If you want to tune from all available satellites, select “Any Satellite”.

② Check the signal condition and the message

If you select “Any Satellite”, this step is skipped.

- It takes a while to check the connection for your selected satellite.
- Ensure that the Signal Lock status is shown as “Locked”. If it is not locked, the search cannot be executed.
- If the status is shown as “Not locked” and Signal Quality / Signal Strength have no indications, please check the dish alignment.
If the status is shown as “Not locked” but there are some levels of Signal Quality / Signal Strength indicated, select “Any Satellite” in Satellite Selection and try again.

③ Set the search mode and start Auto Setup

- If you select “Astra2/Eurobird” or “Any Satellite”, freesat channels will also be searched. But the channels which have already been tuned in freesat will not be duplicated.

Settings are made automatically

When the operation is completed, the channel at channel position “1” will be displayed.

Add Other Sat. channel automatically **Add New Channels**

You can add any new channels found automatically to Channel List.

① Check the signal condition

If you selected “Any Satellite” in Auto Setup, this step is skipped.

- It takes a while to check the connection for your selected satellite.
- Ensure that the Signal Lock status is shown as “Locked”. If it is not locked, the search cannot be executed.
- If the status is shown as “Not locked” and Signal Quality / Signal Strength have no indications, please check the dish alignment.

② Set the search mode and start Add New Channels

- New channels can only be added to the existing Channel List from the same satellite.

Tuning and Editing Channels

List favourite Other Sat. channels **Favourites Edit**

Timer Programming

Timer Programming from Menu

The Timer Programming menu allows you to choose programmes that you wish to remind watching or record to the external recorder or the USB HDD. At the correct time, the TV will tune to the correct channel automatically to record even if the TV is in Standby mode.

TV Guide may also be used to set timer programming event (p. 22).

- Timer Programming can store up to 15 events.
- For recording using Timer Programming, the TV must be either On or in standby. For reminders to be displayed, the TV must be On.
- No other channel can be selected while the recording of Timer Programming is in progress.
- It may not be possible to record an encrypted programme (which is copy-protected).
- When recording programmes to the external recorder, be sure to make the proper settings on the recorder connected to the TV.

If a compatible recorder with Q-Link or similar technologies is connected to the TV (p. 92) and the “Link Settings” (p. 38) are correct, no setting of the recorder is required. Also read the manual of the recorder.

- If the recorder is not compatible with Q-Link or similar technologies, set “Q-Link” in the Setup Menu (p. 38) to the connected terminal (AV1 or AV2), and set the timer of the recorder in addition to the Timer Programming on the TV. For preparations of a recorder, read the manual of the recorder.
- When recording programmes to the USB HDD, be sure to register the USB HDD and enable it for recording in the “USB HDD Setup” (p. 68).
- Recordings are always in standard definition composite video via SCART, even if the original programme is in high definition.

1 Select the tuner you want to use

→ p. 16

2 Display the menu

3 Select “Setup”

4 Select “Timer Programming”

■ To return to TV

■ To unlock the tuner (stop recording)

5 Set

Note

- Check that the LED is orange. If not, timer programmes are not active or not stored.
- Timer Programming reminder messages will remain displayed until one of the following occurs:
 - You press the OK button to view the programme or the EXIT button to cancel the reminder.
 - The timer programming event that the reminder is set for ends.
- “!” identifies that any timer programming events have overlapped. “Ext Rec.” and “USB HDD Rec.” are given priority over “Reminder”. When two or more “Ext Rec.” / “USB HDD Rec.” overlap, the first timer programming event starts and finishes as programmed. The next timer programming event will then start.
- 2 mins. before the starting time, a reminder message appears if you are watching TV.
 - To remove the message and start the programme →
 - To cancel the Timer Programming →
- The recording of Timer Programming will automatically change to the programmed channel 10 seconds before the start time.
- To stop recording of the timer programming event, it may be necessary to stop the recorder manually.
- The recording of Timer Programming will be performed even if the TV is in Rewind LIVE TV recording (p. 71) and Pause Live TV recording (p. 95). In this case, these recordings will be cancelled.

Set timer programming event details Timer Programming

① Start making the settings

② Select the function (Ext Rec., USB HDD Rec. or Reminder)

select

Ext Rec. / USB HDD Rec. : to record the programme to the external recorder (Ext Rec.) or the USB HDD (USB HDD Rec.)

When the start time comes, the channel will be switched automatically and the video and audio signals will be output. 2 mins. before the starting time, a reminder message appears if you are watching TV.

Reminder : to remind you to watch the programme

When you are watching TV, a reminder message appears 2 mins. before the start time. Press the OK button to switch to the programmed channel.

③ Set the channel, date and time (repeat the operations as below)

Set items in the order of ① to ④.

select the item

set

● ①, ③ and ④ can also be entered with numeric buttons.

→ Select the programme to be viewed

● Press again to return to Timer Programming menu.

■ Guide link programming (Timer Programming from the TV Guide signal) → p. 23

● This function is not available in Analogue or Other Sat. mode.

Guide link programming is Timer Programming which is controlled by information from the TV Guide; if programme start and end times are changed by the broadcaster, the timer programming event will follow the change. A Split Programme programming is a Guide link programming which is interrupted by one or more other programmes. Note that Guide link programming (including Split Programme programming) only works reliably if correct information is received from broadcasters.

Child Lock

You can lock specific channels / AV input terminals and control who watches them. When the locked channel / input is selected, a message appears; by entering the PIN number, you can watch it.

Advanced

Using Common Interface

The Common Interface Module menu provides access to software contained on Common Interface (CI) Modules.

This TV works only Pay TV modules complying with CI standard.

- This function is not available for BSkyB's Sky channels.

Caution

- Turn Off Mains power On / Off switch whenever inserting or removing the CI module.
- If a viewing card and a card reader come as a set, first insert the card reader, then insert the viewing card into the card reader.
- Insert the module in the correct direction.

Insert the CI module (optional)

- The features that appear on screen are dependent on the contents of the selected CI module.
- Follow the instructions that came with the viewing card to tune in the pay-TV channels. If pay-TV channels do not appear, perform the below to verify the card is recognized by the TV.
- For more details, see the manual of the CI module, or check with the broadcaster.

- 1 Select DVB or Other Sat.**
→ p. 16
- 2 Display the menu**
- 3 Select "Setup"**
- 4 Select "System Menu"**
- 5 Select "Common Interface"**
- 6 Access Common Interface**
- 7 Follow the on screen operation guide (Check the instructions provided with the CI module)**

■ To return to TV

For example: select, go →

Coloured characters →

- On screen operation guide may not correspond to the remote control buttons.

Updating the TV Software

From time to time, a new version of software may become available for download to enhance the performance or operations of the TV.

In DVB mode, a notification banner will appear when one of the BBC channels is turned to if a new available software is found.

- To download →
- If you choose not to download →

You can update any new software automatically, or manually.

- 1 Display the menu**

Update TV's software system **System Update**

■ To update automatically

Select "Auto Update Search in Standby" and set to "On"

- Automatically performs a search in standby and downloads an update, if any software updates are available.
- The automatic updating is performed at night under the following conditions:
 - Standby (TV turned Off with the remote control)
 - Recording of Timer Programming, Direct TV Recording or One Touch Recording is not in progress.

If System Update is performed, the software will be updated (it may change TV functions). If you do not wish to do so, set "Auto Update Search in Standby" to "Off". The notification banner will keep appearing during the period of new software availability, usually 2 to 3 days.

■ To update immediately

Select "System Update Search Now"

Searches for an update (for several mins.) and displays a corresponding message if any → Download

Note

- Download may take up to 60 mins.
- During software download and update, DO NOT perform any operations on the TV or switch Off the TV.

Displaying PC Screen on TV

The screen of the PC connected to the TV can be displayed on the TV.
You can also listen to PC sound with the audio cable connected.

Copy the settings to the other input **Copy Adjustment**

You can copy the selected “Professional1” or “Professional2” settings to that of the other input. The settings of Contrast, Brightness, Colour, Sharpness, Tint and Advanced Settings will be copied.

Select the destination to copy to

- select
- copy

- You cannot copy to the locked mode.

USB HDD Recording

You can record the digital TV programmes to the connected USB HDD and enjoy playing back in various ways.

- Analogue TV programme cannot be recorded to the USB HDD.
- The data broadcasting (MHEG, etc.), radio broadcasting and the periods without any signal will not be recorded.
- Not all the programmes can be recorded depending on the broadcaster and service provider.
- This TV supports USB HDD with capacity from 160 GB up to 2 TB.
- If the remaining capacity of the USB HDD is run out, the recording cannot be done.
- Regarding the performance, not all USB HDDs are guaranteed.

Check the USB HDDs that have been tested for the performance with this TV at the following website. (English only)

<http://panasonic.jp/support/global/cs/tv/>

Caution

- Register the USB HDD with this TV in order to use it for recording. Please note that USB HDD will be formatted and all data (including the data from your PC, etc.) in it will be erased when you register it.
- In order to use the USB HDD with your PC after you use it with this TV for recording, format the drive on your PC. To format, refer to the manual of the PC. Please note that all data in the USB HDD will be erased when it is formatted.
- The data recorded to the USB HDD with this TV can only be played back on this TV. You cannot playback its contents with another TV (including the TV of the same model number) or any PCs.
- If your TV is repaired due to a malfunction, the registered USB HDD may not be available with your repaired TV. Register this USB HDD again to use it with your repaired TV. (All data in it will be erased.)

USB HDD connection

Connect the USB HDD to the USB 1 or 2 port.

socket outlet

- Be sure to connect the USB HDD to the socket outlet.
- Do not turn off or disconnect the USB HDD during operation. It may cause malfunction of the drive or damage the recorded data.
- To remove the USB HDD safely from the TV → p. 69 and p. 73

Setting for USB HDD

Register and setup the USB HDD with this TV in order to use it for recording. Connect the USB HDD before starting this settings. → “USB HDD connection” (above)

- Before the settings, be sure to turn on the USB HDD.
- You cannot change the settings for the USB HDD while recording is in progress.
- Please note that USB HDD will be formatted and all data in it will be erased when you register it.

1 Display the menu

2 Select “Setup”

3 Select “USB HDD Setup”

4 Select “Device Setup” and set

■ To return to TV

Register and setup the USB HDD Device Setup

All the USB devices recognized as a mass storage device will be listed. You can only register USB HDDs.

- Up to 8 USB HDDs can be registered with this TV. However you can only choose one USB HDD for recording at a time.
- Some USB HDD may not be registered.

Select the USB HDD for recording and start registration / setup

Connect	Product	Name	Mode
Yes	USB Drive A		
Yes	USB Flash Disk		

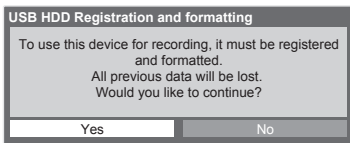

- For the information of the highlighted device →

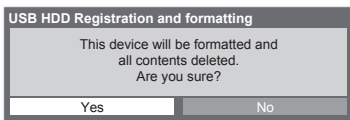

Caution of USB HDD recording and playing back

Confirmation of USB HDD registration

Confirmation of USB HDD format

Confirmation of USB HDD name

The name for the registered USB HDD is created automatically. If you want to edit the name, select "Yes".

Set characters one by one

Store

- You can set characters by using numeric buttons. → "Characters table for numeric buttons" (p. 101)

Confirmation to enable USB HDD for recording

If the registered USB HDD for recording already exists, this confirmation screen will be displayed to switch to enable this USB HDD for recording.

- : The USB HDD is registered and available for recording / playing back if the connection status is "Yes". Only one registered USB HDD on the list can be available for recording.

- ▶ : The USB HDD is registered and available for playing back if the connection status is "Yes".

Name is displayed if the registration is completed

Connection status (Yes: connected / No: not connected)

To remove the USB HDD safely from the TV, ensure the status is "No" before removing.

- To change the status → yellow

- You can also remove the USB HDD safely from Media Player → "Remove the USB devices safely" (p. 73)

To unregister the registered USB HDD

- Once you unregister the USB HDD, it will not be possible to playback any of the recorded content on any TV. Select the USB HDD Unregister

- The confirmation screen will be displayed twice. Select "Yes" to unregister.

USB HDD Recording

Recording the TV programme to USB HDD

You can record the current programme immediately by using “One Touch Recording”. You can also record the current programme constantly for the selected period by using “Rewind LIVE TV” so that you can go back or pause the current programme.

- Ensure the connection, registration and setup are completed before start recording → p. 68 and p. 69
- Ensure not to connect or disconnect any USB devices during USB HDD recording. Otherwise the recording may not work properly.

1 Display the menu

MENU

2 Select “Setup”

3 Select “USB HDD Setup”

4 Select “One Touch Recording” or “Rewind LIVE TV”

■ To return to TV

5 Set

One touch direct TV recording - What you see is What you record One Touch Recording

Recording the current programme in the USB HDD immediately.
Select the maximum recording time (30 / 60 / 90 / 120 / 180 minutes)

■ To start One Touch Recording

Set the position to "TV" Start

- No other channel can be selected while the recording is in progress.

■ To stop recording on the way

■ To playback or delete the recorded contents

- ➔ "Using Media Player" (p. 77) or "Video" in VIERA TOOLS (p. 34)
- Even if One Touch Recording is in progress, you can playback all the contents. However, the recording may not work properly while playback.

Record constantly Rewind LIVE TV

Recording the current programme constantly.
 ● This function will not work on MHEG Linked services, i.e. ITV HD and BBC Multiscreen.

Select "On" to start Rewind LIVE TV

- When you select "On", the recording will start automatically.

■ To operate the Rewind LIVE TV

Set the position to "TV"

- To pause ➔
- To search backward ➔ (press and hold for about a second)
- After pausing or searching backward, the following buttons are available to operate.

■ To stop the Rewind LIVE TV

- If you stop the Rewind LIVE TV, the recorded content for the Rewind LIVE TV will be deleted.
- Rewind LIVE TV will be stopped and the recorded content deleted automatically in the following conditions: (Even if Rewind LIVE TV stops for the following conditions, as long as the setting is "On", the new recording will start automatically in a condition that makes the recording available.)
 - selected other channels
 - selected locked channel
 - selected invalid channel
 - no TV signal
 - when the other recording starts
 - when the TV is turned off or standby

Using Media Player

Media Player allows you to enjoy photo, video or music recorded on an SD Card and a USB Flash Memory, and recorded contents on the registered USB HDD.

VIERA IMAGE VIEWER is the function of the easy viewing for photos or videos recorded on an SD Card on the TV screen by simply inserting into the SD Card slot.

Photo mode : Still pictures recorded by digital cameras will be displayed.

Video mode : (For SD Card or USB Flash Memory) Moving pictures recorded by digital video cameras will be played back.
(For registered USB HDD) TV programmes recorded in USB HDD registered to this TV will be played back.

Music mode : Digital music data will be played back.

- During the operation, audio signal is output from AV1, AV2, AUDIO OUT and DIGITAL AUDIO OUT terminals, but no video signals are output. AV1 and AV2 can output audio signal if "AV1 / AV2 out" is set to "Monitor" in the Setup Menu (p. 38).
- "Date" shows the date on which the recording was made by the recording equipment. The file without record of the date is shown "***/**/****".

■ Data format for SD Card / USB Flash Memory browsing

- Photo : Still images taken by digital still cameras, recorded in JPEG files of DCF*¹ and EXIF standards.
Data format - Baseline JPEG (Sub-sampling 4:4:4, 4:2:2 or 4:2:0)
MPF (3D) : Multi Picture Format for 3D still image (Extension - ".mpo")
Image resolution - 8 × 8 to 30,719 × 17,279 pixels
- Video : SD-Video Standard Ver. 1.2 [MPEG-2 (PS format)] and AVCHD*² Standard compatible files with an audio format that is either MPEG-1/Layer-2 format or Dolby Digital format
(A modified data with a PC may not be displayed correctly.)
DivX ➔ p. 101
MKV (Matroska Video) file
- Music : Data format - MP3 and AAC (Copy-protected files cannot be played back.)
- SD Card format : SDXC Card - exFAT
SDHC Card / SD Card - FAT16 or FAT32
- Compliant card type (maximum capacity): SDXC Card (64 GB), SDHC Card (32 GB), SD Card (2 GB), miniSD Card (2 GB) (requiring miniSD adapter)
- If miniSD Card is used, insert / remove it together with the adapter.
- Check the latest information on the card type at the following website. (English only)
<http://panasonic.jp/support/global/cs/tv/>
- USB Flash Memory format : FAT16, FAT32 or exFAT
(A USB HDD formatted by PC is not supported in Media Player.)

*1: DCF (Design rule for camera file system): Unified standard established by Japan Electronics and Information Technology Industries Association (JEITA).

*2: Including 3D videos in Side by Side mode.

Note

- Format the device with the recording equipment.
- The picture may not appear correctly on this TV depending on the recording equipment used.
- Display may take some time when there are many files and folders.
- This function cannot display Motion JPEG or still images that are not JPEG format (i.e. TIFF, BMP).
- Data modified with a PC may not be displayed.
- Images imported from a PC must be compatible with EXIF (Exchangeable Image File) 2.0, 2.1, and 2.2.
- Partly degraded files might be displayed at a reduced resolution.
- The folder and file names may be different depending on the digital camera or digital video camera used.
- Do not use two-byte characters or other special codes.
- The device may become unusable with this TV if the file or folder names are changed.

■ To insert or remove the SD Card / USB Flash Memory

- For the USB HDD Connection ➔ p. 68

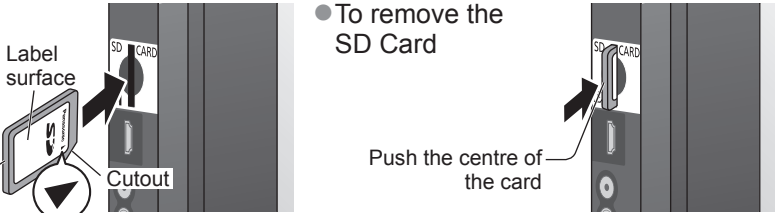

USB Flash Memory

- Insert or remove straightly and completely.
- Before removing the USB Flash Memory, ensure to perform "Remove the USB devices safely" (p. 73)

SD Card

- To insert the SD Card
Gently insert the SD Card label surface facing front.
Push until a click is heard
- To remove the SD Card
Push the centre of the card

- For more information of the SD Card ➔ p. 100

Starting Media Player

- 1 Insert the SD Card or USB Flash Memory**
 ● For registered USB HDD, ensure the connection status is "Yes". ➔ p. 69
- 2 Switch to Media Player**
 SD CARD
 ● When SD Card is inserted, switching will be done automatically.
- 3 Start Media Player**

 OK
- 4 Select the icon you want to access to**

 selected device name

 ① select
 ② access
 ● If two or more devices are not connected, this step will be skipped.
 ● For the registered USB HDD, all the USB HDD of which the connection status is "Yes" is available.
 ➔ "Register and setup the USB HDD" (p. 69)

- If you remove the device in which the registered music is stored, the setting of "User" will be reset.

While playing music, display the selection screen

Select "File" or "Folder" and set

- File : The current music will be registered as back ground music.
- Folder : All the music in the current folder will be registered as back ground music.

Using Network Services

(DLNA / VIERA CAST / freesat)

DLNA®

This TV is a DLNA Certified™ product.

DLNA (Digital Living Network Alliance) is a standard that makes DLNA Certified digital electronics easier and more convenient to use on a home network. To learn more, visit www.dlna.org.

It allows you to share photos and videos (including 3D images) stored in the DLNA Certified media server (for example, PC with windows 7 installed, DIGA Recorder etc.) connected to your home network, and enjoy watching them on the TV screen.

■ Applicable data format

Photo : JPEG (Sub-sampling 4:4:4, 4:2:2 or 4:2:0)

Image resolution - 8 × 8 to 30,719 × 17,279 pixels

- Motion JPEG and Progressive JPEG are not supported.

Video : MPEG2 (PS format and TS format)

Image resolution - Up to 1,920 × 1,080 pixels

FPS (Frame Per Second) - 24 / 25 / 30 fps

- PS (Program Stream) format : used for DVD recording, etc.
- TS (Transport Stream) format : used for digital broadcasts, internet, etc.
- Depending on the network environment, including lack of transfer speed, contents may not be played back properly.
- AVCHD and DivX files are not supported by DLNA, but can be played by Media Player (p. 76).
- Music files are not supported by DLNA functions of this TV, but MP3 and AAC files can be played back by Media Player (p. 79).

■ Media server

Store photos or videos into the media server, and then you can watch them on the TV.

To use a PC as a media server

Prepare the PC with Windows 7 or ensure the server software is installed on the PC.

“Windows 7” and “TwonkyMedia server 5.1.x (installed on the PC with Windows 7, Windows Vista or Windows XP)” are the server software that has been tested for compatibility with this TV (current as of January, 2010). Any other server software have not been tested with this TV, therefore compatibility and performance cannot be assured.

● Windows 7

- The setup for homegroup settings of Windows 7 is required.
 - ➔ “How to use Windows 7 as a media server” (p. 103)
- This TV does not support DLNA control functions from Windows 7.

● TwonkyMedia server

- “TwonkyMedia server” is the product of PacketVideo Corporation.
- To obtain the Installation Guides for installing and setting “TwonkyMedia server”, visit the website of TwonkyMedia.
- Additional fees may be charged to obtain server software.

Note

- For more information about the server software, please consult each software company.
- Software which has the file sharing feature may be available with this TV. But, all the features may not be used.
- When server software for the media server is installed on the PC, the data may be at risk of being accessed by other people. Please take care of the settings and connections under the network circumstances at the office, hotel or even at home when not using a router.

To use a DLNA compatible DIGA Recorder as a media server

By connecting a DLNA compatible DIGA Recorder to your home network, you can enjoy and control it as one of the media servers.

- Please refer to the manual of your DIGA Recorder to confirm whether the recorder is compatible with DLNA.

■ Network connection

- ➔ Example 1 or Example 2 in “Network connections” (p. 81)

■ Network setup

- ➔ p. 82 - 85

■ DLNA operations

- ➔ p. 86 - 88

VIERA CAST™

VIERA CAST is a gateway to the internet services unique to Panasonic.

By connecting the TV to the internet environment, VIERA CAST allows you to enjoy internet content on the TV screen such as photos, videos, weather, etc. from VIERA CAST home screen.

You can access VIERA CAST home screen directly by pressing the VIERA CAST button on the remote control.

■ Network connection

- ➔ Example 1 or Example 3 in “Network connections” (p. 81)

■ Network setup

- ➔ p. 82 - 85

■ VIERA CAST operations

- ➔ p. 89

freesat

freesat will give you access to the great interactive services and features through an internet connection.

- Please contact broadcasters for availability of services.

Network connections

To use only DLNA features, you can operate the features without Broadband network environment. To use VIERA CAST features or freesat interactive services, you need a Broadband network environment.

- If you do not have any Broadband network services, please consult your retailer for assistance.
- Confirm the terms and conditions of the contracts with your Internet Service Provider (ISP) or telecommunications company.
- Set up and connect any equipment required for the network environment.
- Required speed (effective): at least 1.5 Mbps for SD and 6 Mbps for HD picture quality, respectively. If the transfer speed is not enough, contents may not be played back properly.
- Read the manual of the network equipment, too.

■ Example 1

- Ensure to use a LAN straight cable for this connection.
- If your modem has no broadband router functions, use a broadband router.
- If your modem has broadband router functions but there are no vacant ports, use a hub.
- Ensure that the Broadband routers and hubs are compatible with 10BASE-T / 100BASE-TX.
- If you use the equipment compatible only with 100BASE-TX, category 5 LAN cables are required.

■ Example 2

You can connect the TV and the equipment directly to use DLNA features.

- Ensure to use a LAN cross cable for this connection.

■ Example 3

You can connect the TV and the telecommunication equipment directly to use VIERA CAST features.

Note

- Depending on the ISP or telecommunications company, the required equipment and the internet connection procedure are different. Ensure that you use the network equipment that are authorized by your ISP and telecommunications company.
- You cannot make settings for the network equipment on this TV. You may be required to make settings on your computer.
- Depending on the terms and conditions of the contracts with your ISP or telecommunications company, additional fees may be charged or multiple connections to the internet may be impossible.
- Please contact your ISP or telecommunications company if you require further assistance regarding the network equipment.

Using Network Services

(DLNA / VIERA CAST / freesat)

Network settings for the LAN Cable connection

This setting is for the network connection by using the LAN cable.

① Select "Network Type" and set to "Wired"

If you make the network connection like "Example2" (p. 81), you do not have to set "Acquire DNS Address", "Proxy" and "Proxy Port".

② Select "IP/DNS Settings" and set the items

After settings, return to "Network Setup" screen →

■ Acquire IP Address

■ Acquire DNS Address

Sets IP Address, Subnet Mask, Gateway, Primary DNS and Secondary DNS.

For most users, the recommended method of connection to your network is by using Auto feature.

Select "Acquire IP Address" and then set to "Auto"

Select "Acquire DNS Address" and then set to "Auto"

- The available settings are displayed automatically.

Manual settings

If you wish to set these functions manually, select "Manual".

Select "IP Address", "Subnet Mask", "Gateway", "Primary DNS" or "Secondary DNS"

Move the cursor and enter the number

③ Select "Proxy Settings" and set the items

After settings, return to "Network Setup" screen →

■ Proxy

Sets Proxy address.

- This is the address of the relay server that is connected to the target server instead of the browser and sends data to the browser. Setting is required if specified by the provider.

Select "Proxy"

Enter the address

Set characters one by one

Store

- You can set characters by using numeric buttons. → "Characters table for numeric buttons" (p. 101)

■ Proxy Port

Sets Proxy port number.

- This number is also specified by the provider with the Proxy address.

Select "Proxy Port"

Move the cursor and enter the number

④ Select "Connection Test" and access to test

- ☑ : **succeeded**
The test is successful and the TV is connected to the network.
- ☒ : **failed**
Check the settings and connections, and then perform this function again.

Performs automatic testing of the network connection for the TV. (It takes a while to test.)

Using Network Services

(DLNA / VIERA CAST / freesat)

Network settings for the Wireless LAN connection

This setting is for the network connection by using Wireless LAN Adaptor. (Wireless LAN connection)

● Confirm the encryption key, settings and positions of your access point before starting setup. For details, read the manual of the access point.

① Select "Network Type" and set to "Wireless"

② Select "Access Point Settings"

③ Select the connection type and set

● For details of each connection type → p. 85

After settings, return to "Network Setup" screen → (OK)

④ Confirm the connection status of "Access Point Settings"

- : "Wired" is selected in "Network Type".
- No adaptor : Wireless LAN Adaptor is not connected.
- No settings : Setting for connecting to the access point has not been set.
- Connecting... : Connecting to the access point in progress.
- Connected : Wireless LAN connection to the access point succeeded.
 - To display the current access point settings, press the OK button.
 - To change the settings, select "No" on this screen.
 - Some access points do not allow access to the internet. Perform "Connection Test" (below) to check if internet connection is available.

USB overcurrent : Overcurrent error → p. 108

⑤ Select "Connection Test" and access to test

Performs automatic testing of the network connection for the TV. (This may take some time.)

- : **succeeded**
The test is successful and the TV is connected to the network.
- : **failed**
Check the settings and connections, and then perform this function again.
If you continue to have difficulty, please contact your internet service provider.

WPS(Push button)

WPS(Push button)

1) Please press the 'WPS' button on the access point until its light flashes.

2) When the light is flashing select 'Connect' on TV.

If you are unsure, please check the instruction manual of the access point.

Connect

Press the WPS button on the access point until the light flashes. And then, press the OK button to connect the Wireless LAN Adaptor and the access point.

- Ensure that your access point supports WPS for this setup.
- WPS: Wi-Fi Protected Setup™

Search for access point

Access points found automatically are listed.

No.	SSID	Wireless type	Encrypt	Protection

- When options with numbers are displayed ➔

- Video communication (ex. Skype™) requires an exclusive Communication Camera TY-CC10W (optional accessory ➔ p. 6). For details, read the manual of the Communication Camera.

- Setup & Help menu (Items in the “Setup & Help” may change without notice.)

Customize HomeScreen	Changes the position of each services on VIERA CAST home screen
My Account	Confirms or removes the account information of the TV you entered on VIERA CAST
Lock	Sets to restrict access to some services
Beep	Sets beep sound On or Off when operating VIERA CAST
Notices	Displays the information of VIERA CAST
Help	Explains the setup items and operations in VIERA CAST

■ USB Keyboard

You can input characters on VIERA CAST screen by using the USB Keyboard connected to the USB port.

- You cannot use two or more keyboards simultaneously.
- The USB Keyboard which requires the driver is not supported.
- To change the language type ➔ “USB Keyboard Layout” (p. 40)

Note

- Be sure to update the software when a software update notice is displayed on the TV screen. If the software is not updated, you will not be able to use VIERA CAST. You can update the software later manually ➔ “Software Update” in the Network Setup Menu (p. 82)
- VIERA CAST™ home screen is subject to change without notice.
- The services through VIERA CAST™ are operated by their respective service providers, and service may be discontinued either temporarily or permanently without notice. Therefore, Panasonic will make no warranty for the content or the continuity of the services.
- All features of websites or content of the service may not be available.
- Some content may be inappropriate for some viewers.
- Some content may only be available for specific countries and may be presented in specific languages.
- Depending on the connection environment, the internet connection may be slow or may not be successful.
- During the operation, audio signal is output from AV1, AV2, AUDIO OUT and DIGITAL AUDIO OUT terminals. But no video signals are output. AV1 and AV2 can output audio signal if “AV1 / AV2 out” is set to “Monitor” in the Setup Menu (p. 38).
- You can set to restrict using VIERA CAST ➔ “Child Lock” (p. 58)
- Turn the TV off, and then on again when changing or reconnecting the network connection.

Link Functions (Q-Link VIERA Link)

Q-Link connects the TV and DVD Recorder / VCR, and enables easy recording, playback, etc. (p. 92)
 VIERA Link (HDAVI Control™) connects the TV and the equipment with VIERA Link function, and enables easy control, convenient recording, playback, energy saving, creation of a home theatre, etc., without complicated setting. (p. 93 - 97)

You can use Q-Link and VIERA Link functions together.

- This TV supports "HDAVI Control 5" function. But available features are depending on the connected equipment's version of HDAVI Control. Please refer to the manual of the equipment to confirm the version.
- VIERA Link features may be available even with other manufacturers' equipment supporting HDMI CEC.

Summary of Q-Link and VIERA Link features

Connection

- To use Player theatre / Blu-ray Disc theatre:

- To use Amplifier:

- Use a fully wired HDMI compliant cable.
- Connect the equipment supporting VIERA Link to the TV's HDMI2, HDMI3 or HDMI4 terminal via an HDMI cable.
- Use a fully wired SCART cable.
- If you use a SCART cable for audio output, connect the equipment supporting VIERA Link to the TV's AV1 or AV2 terminal and set "AV1 / AV2 out" to "Monitor" in the Setup Menu (p. 38).
- Use any one of the optical digital audio cable, RCA cable and SCART cable for audio output from the TV.

*1: Available with the equipment which has "HDAVI Control 2 or later" function.

*2: Available with the equipment which has "HDAVI Control 3 or later" function.

*3: Available with the equipment which has "HDAVI Control 4 or later" function.

*4: Available with DIGA Recorder which has HDD.

*5: while playing a disc

*6: except for watching a disc

*7: If the connected equipment has "HDAVI Control 5" function, you do not have to use this audio cable (Optical digital audio cable, RCA cable or SCART cable). In this case, connect the equipment to the TV's HDMI2 terminal via an HDMI cable.

■ VIERA Link Control of compatible equipment (VIERA Link Control → p. 96)

- Table below displays maximum number of compatible equipment that can be controlled by VIERA Link Control. This includes connections to equipment already connected to the TV.

For example, DIGA Recorder connected to Amplifier which is connected to the TV via an HDMI cable.

Type of the equipment	Maximum number
Recorder (DIGA Recorder, etc.)	3
Player (DVD Player, Blu-ray Disc Player, HD Video Camera, LUMIX Camera, Digital Camera, Player theatre, Blu-ray Disc theatre, etc.)	3
Audio system (Player theatre, Blu-ray Disc theatre, Amplifier, etc.)	1
Tuner (Set top box, etc.)	4

Link Functions (Q-Link VIERA Link)

Q-Link

■ Preparations

- Connect the DVD Recorder / VCR with the following logos:
“Q-Link”, “NEXTVIEWLINK”, “DATA LOGIC”, “Easy Link”, “Megalogic” or “SMARTLINK”
- Q-Link connection → p. 90
- Use fully wired SCART cable.
- Set up the DVD Recorder / VCR. Read the manual of the recorder.
- Q-Link terminal setup in the Setup Menu → “Q-Link” (p. 38), “AV1 / AV2 out” (p. 38)
- Download Analogue channel setting → “Analogue channel download” (see below)

■ Features available

Analogue channel download

Analogue channel settings can be downloaded to a recorder with an analogue tuner (where Analogue is still broadcast). Digital channel settings are not downloaded.

- To download the Analogue channel settings → “Q-Link Download” (p. 38) or “Auto Setup” in Analogue mode (p. 45) or “Auto Setup” - when first using the TV (p. 12)

Direct TV Recording - What you see is What you record

Recording the current programme on a DVD Recorder / VCR immediately.

- Available conditions:

Picture source	Mode	Recording from
Analogue	TV	TV monitor out
	AV	Recorder's tuner
freesat, DVB, Other Sat.	TV	TV monitor out
AV (watching recorder's tuner)	AV	Recorder's tuner
AV (watching recorder's external input)	AV	Recorder's external input
AV (watching TV's external input)	AV	TV monitor out

- When Direct TV Recording is performed, the recorder is automatically turned on if it is in Standby mode.
- Changing channel or turning off the TV is available while the recorder is recording from its own tuner.
- Changing channel is not available while the recorder is recording from the TV tuner.

■ To stop recording

Power on link and Easy playback

When the DVD Recorder / VCR starts playback or the direct navigator / function menu for the equipment is activated, the TV is turned on and the input mode is switched automatically so that you can view the content. (Only when the TV is in Standby mode.)

Power off link

When the TV is set to Standby mode, the recorder is also automatically set to Standby. (Only when the videocassette or disc is not active.)

- This function will work even if the TV enters Standby mode automatically by auto power standby function.

- “DATA LOGIC” (a trademark of Metz Corporation)
- “Easy Link” (a trademark of Philips Corporation)

- “Megalogic” (a trademark of Grundig Corporation)
- “SMARTLINK” (a trademark of Sony Corporation)

Note

- Some recorders are not compatible. Read the manual of the recorder.

VIERA Link “HDAVI Control™”*

*Enjoy additional HDMI Inter-Operability with Panasonic products which have “HDAVI Control” function. This TV supports “HDAVI Control 5” function.

Connections to the equipment (DIGA Recorder, HD Video Camera, Player theatre, Amplifier, etc.) with HDMI and SCART cables allow you to interface them automatically (p. 90 and p. 91).

These features are limited to models incorporating “HDAVI Control” and “VIERA Link”.

- Some functions are not available depending on the equipment’s version of HDAVI Control. Please confirm the connected equipment’s version of HDAVI Control.
- VIERA Link “HDAVI Control”, based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers’ equipment that supports HDMI CEC cannot be guaranteed.
- Please refer to individual manuals for other manufacturers’ equipment supporting VIERA Link function.
- For information about applicable Panasonic equipment, consult your local Panasonic dealer or refer to www.panasonic.co.uk

■ Preparations

- Connect the equipment that supports VIERA Link.
- VIERA Link connection → p. 90 and p. 91
- Use a fully wired HDMI compliant cable. Non-HDMI-compliant cables cannot be utilized.
Recommended Panasonic HDMI cables’ part numbers:
 - RP-CDHS15 (1.5 m)
 - RP-CDHS30 (3.0 m)
 - RP-CDHS50 (5.0 m)
- Use a fully wired SCART cable.
- Set up the connected equipment. Read the manual of the equipment.
- For optimal recording, the settings of the recorder may need to be changed. For details, read the manual of the recorder.
- Download Analogue channel setting → “Analogue channel download” (see below)
- Set VIERA Link On in the Setup Menu → “VIERA Link” (p. 38)
- Set up the TV
 - **After connection, turn the equipment on and then switch the TV on. Select the input mode to HDMI1, HDMI2, HDMI3 or HDMI4 (p. 28), and make sure that an image is displayed correctly.**
This setup should be done each time when the following conditions occur:
 - for the first time
 - when adding or reconnecting equipment
 - when changing setup

■ Features available

Analogue channel download

Analogue channel settings can be downloaded to a recorder with an analogue tuner (where Analogue is still broadcast). Digital channel settings are not downloaded.

- To download the Analogue channel settings → “Q-Link Download” (p. 38) or “Auto Setup” in Analogue mode (p. 45) or “Auto Setup” - when first using the TV (p. 12)

Easy playback

Automatic Input switching - When the connected equipment is operated (during playback or menu operations, etc.), the input mode is switched automatically. When playback is stopped or menus are exited, the input mode returns to the original setting.

Power on link

When the connected equipment starts playback or the direct navigator / function menu for the equipment is activated, the TV is automatically turned on and the input mode is switched automatically so that you can view the content. (Only when the TV is in Standby mode.)

Power off link

When the TV is set to Standby mode, the connected equipment is also automatically set to Standby.

- This function will work even if the TV enters Standby mode automatically by auto power standby function.

Link Functions (Q-Link VIERA Link)

■ Features available

Reduce unnecessary power consumption in standby **Standby Power Save**

Set Standby Power Save "On" in the Setup Menu to use this function

→ "Standby Power Save" (p. 38)

The power consumption in Standby mode of the connected equipment is controlled in synchronization with the TV On / Off state.

When the TV is set to Standby mode, the connected equipment is automatically set to Standby and the power consumption in Standby mode of the connected equipment is automatically minimized.

When the TV is turned on and the connected equipment is still in Standby mode, the power consumption of the connected equipment is increased to reduce the startup time.

- This function is effective if the connected equipment can change the power consumption in Standby mode and is set to higher consumption.

Auto standby for unnecessary equipment **Intelligent Auto Standby**

Set Intelligent Auto Standby "On (With reminder)" or "On (No reminder)" in the Setup Menu to use this function

→ "Intelligent Auto Standby" (p. 38)

When the TV is On, non-watched or non-used connected equipment goes into Standby mode automatically to reduce power consumption. For example, when the input mode is switched from HDMI, the connected equipment will go into Standby mode / when Speaker Selection is changed to "TV", the Player theatre will go into Standby mode (except when watching a disc).

- If you select "On (With reminder)", the on screen message will be displayed before the connected equipment turns to Standby.
- This function may not work properly depending on the connected equipment. If required, set to "Off".

■ Features available (Using VIERA Link Menu)

Direct TV Recording - What you see is What you record **Direct TV Rec**

Recording the current programme on a DIGA Recorder immediately.

- If you connect a variety of recorders including other manufacturers' recorders at the same time, please connect the DIGA Recorder to the TV's lower HDMI terminal number. For example, if you use HDMI1 and HDMI2 for two recorders, connect the DIGA Recorder to HDMI1.
- If Direct TV Recording does not operate, check the settings and the equipment
→ "Summary of Q-Link and VIERA Link features" (p. 90 and p. 91), "Preparations" (p. 93)
- If you wish to record a programme that the DIGA Recorder does not support, a SCART connection is required and the programme is recorded by Q-Link function (p. 92).
- Depending on the programme, a SCART connection may be required to record.
- Changing channel or turning off the TV is available while the recorder is recording from its own tuner.
- Changing channel is not available while the recorder is recording from the TV tuner.

1 Display "VIERA Link Menu"

2 Select "Direct TV Rec" and start recording

VIERA Link Menu	
Pause Live TV	Start
Direct TV Rec	Start
VIERA Link Control	Recorder
Speaker Selection	Home Cinema

● You can also start recording directly →

■ To stop recording
Select "Stop" in "Direct TV Rec" and access

VIERA Link Menu	
Pause Live TV	Start
Direct TV Rec	Stop
VIERA Link Control	Recorder
Speaker Selection	Home Cinema

● You can also stop recording directly.

Unlock the tuner

→ →

EXIT

■ Features available (Using VIERA Link Menu)

Pause Live TV programme **Pause Live TV**

You can pause the live TV programme and resume the programme later.
The live TV programme will be recorded on HDD of the connected DIGA Recorder.

- This function is available with a DIGA Recorder which has HDD.
- If you connect a variety of recorders including other manufacturers' recorders at the same time, please connect the DIGA Recorder which has HDD to the TV's lower HDMI terminal number. For example, if you use HDMI1 and HDMI2 for two recorders, connect the DIGA Recorder which has HDD to HDMI1.
- If Pause Live TV does not operate, check the settings and the equipment
 - ➔ "Summary of Q-Link and VIERA Link features" (p. 90 and p. 91), "Preparations" (p. 93)

Access and pause the live TV programme

1
2

Display "VIERA Link Menu"

Select "Pause Live TV" and pause

VIERA Link Menu	
Pause Live TV	Start
Direct TV Rec	Start
VIERA Link Control	Recorder
Speaker Selection	Home Cinema

The TV picture will be paused.

- Live TV programme is recorded on HDD from where it was paused.
- If the paused TV picture disappears after a few minutes
 - ➔ OPTION (the paused picture will be restored)
- Follow the operation guide to operate Pause Live TV function.

■ To operate Pause Live TV

- Operations may be different depending on the recorder. In this case, follow the operation guide or read the manual of the recorder.

- If you stop playback, the recorded programme will be deleted from HDD.

■ To return to Live TV

(stop playback of Pause Live TV / cancel pause)

Select "Yes"

- If you stop playback or cancel pause, the recorded programme will be deleted from HDD.

Link Functions (Q-Link VIERA Link)

■ Features available (Using VIERA Link Menu)

Control the menu of the connected equipment by VIERA remote control

VIERA Link Control

You can control some functions of the connected equipment with this TV remote control (point the remote control at the TV's signal receiver).

- If you cannot operate the menu of the connected equipment, check the settings and the equipment
 - ➔ "Summary of Q-Link and VIERA Link features" (p. 90 and p. 91), "Preparations" (p. 93)
- For details of the operations for the connected equipment, read the manual of the equipment.

Access and operate the menu of the equipment

1

Display "VIERA Link Menu"

2

Select "VIERA Link Control"

select

3

Select the equipment you want to access

The type of the connected equipment is displayed. Select the type of the equipment and access.

① select

② access

Recorder / Player / Home Cinema / Video Camera / LUMIX / Digital Camera / Other

- You can also access directly by using VIERA TOOLS
 - ➔ "How to Use VIERA TOOLS" (p. 34)
- The displayed item may vary depending on the connected equipment.
- "Home Cinema" means Player theatre, Blu-ray Disc theatre or Recorder theatre.
- "Other" means Tuner set top box.

■ If multiple recorders or players are connected

Recorder1-3 / Player1-3

The number is given from the TV's lower HDMI terminal number connected to the same type equipment. For example, two recorders to HDMI2 and HDMI3, in this case the recorder connected to HDMI2 is displayed as "Recorder1", and the recorder connected to HDMI3 is displayed as "Recorder2".

■ If you access non-VIERA Link equipment

The type of the connected equipment is displayed. You can access the menu of the equipment. But you cannot operate it. Use its own remote control to operate the equipment.

4

Operate the menu of the equipment

Available VIERA remote control buttons: (depending on the connected equipment)

① Set the position to "TV"

② Follow the operation guide

- To display the operation guide ➔

If other manufacturers' equipment is accessed, Setup / Contents Selection menu may be displayed.
- When the key words are displayed on colour bar
 - ➔

Note

- Some operations may not be available depending on the equipment. In this case use its own remote control to operate the equipment.

■ Features available (Using VIERA Link Menu)

Speaker control **Speaker Selection**

You can control the home theatre speakers with this TV remote control (point the remote control at the TV's signal receiver).

- If you cannot control the home theatre speakers with this remote control, check the settings and the equipment
 - ➔ "Summary of Q-Link and VIERA Link features" (p. 90 and p. 91), "Preparations" (p. 93)

Access and control the speaker volume

1

Display "VIERA Link Menu"

2

Select "Speaker Selection"

3

Set to "Home Cinema" or "TV"

■ Home Cinema

The Player theatre, Blu-ray Disc theatre or Amplifier will be automatically turned on if it is in Standby mode and the sound will be output from theatre speakers connected to the equipment.

- Volume up / down ➔

- Mute ➔

- The sound of the TV speakers is muted.
- When the equipment is turned off, the TV speakers will be activated.

■ TV

TV speakers are active.

Note

- If you wish to enjoy multi-channel sound (e.g. Dolby Digital 5.1ch) via an Amplifier, connect the Amplifier to the TV with an HDMI cable and an Optical digital audio cable (p. 91), and then select "Home Cinema". If your Amplifier has "HDAVI Control 5" function, you only need to connect with an HDMI cable. In this case, connect your Amplifier to the TV's HDMI2 terminal.
- To enjoy the sound from the DIGA Recorder in multi-channel sound, connect an HDMI cable from the DIGA Recorder to the Amplifier (p. 91).

Note

- These functions may not work properly depending on the connected equipment.
- Image or sound may not be available for the first few seconds when Input mode is switched.
- Easy playback may be available by using the remote control for Player theatre, Blu-ray Disc theatre or Amplifier. Read the manual of the equipment.
- "HDAVI Control 5" is the newest standard (current as of December, 2009) for HDAVI Control compatible equipment. This standard is compatible with conventional HDAVI equipment.
- To confirm this TV's version of HDAVI Control ➔ "System Information" (p. 40)

External Equipment

These diagrams show our recommendations for connection of your TV to various pieces of equipment. For other connections, consult the instructions for each piece of equipment, the table below, and the specifications (p. 115).

Types of connectable equipment to each terminal

Terminal	AV1	AV2	AV3 (Side panel of the TV)
Recording / Playback (equipment)

Technical Information

Auto Aspect

The optimum size and aspect can be chosen automatically, and you can enjoy finer images. (p. 18)

■ Aspect Control Signal

“WIDE” will appear in the top left of the screen if a Widescreen signal (WSS) or a Control signal through SCART / HDMI terminal is found.

The aspect will switch to the appropriate 16:9 or 14:9 widescreen ratio.

This function will work in any aspect mode.

Input terminal	Input signal format	Aspect Control Signal		
		Widescreen signal (WSS)	Control signal through SCART (pin8) / HDMI terminal	
RF	DVB	○		
	PAL I	○		
	PAL 525/60 6.0 MHz	—		
	M.NTSC 6.0 MHz	—		
Satellite	freesat, Other Sat.	○		
AV1 (Composite) AV2 (Composite or S-Video) AV3	PAL	○		○
	PAL 525/60	—		○
	M.NTSC	—		○
	NTSC	—		○
COMPONENT	525 (480) / 60i	—		
	525 (480) / 60p	—		
	625 (576) / 50i	○		
	625 (576) / 50p	○		
	750 (720) / 60p	—		
	750 (720) / 50p	—		
	1,125 (1,080) / 60i	—

	525 (480) / 60p	—	○	
	625 (576) / 50i	—	○	
	625 (576) / 50p	—	○	
	750 (720) / 60p	—	○	
	750 (720) / 50p	—	○	
	1,125 (1,080) / 60i	—	○	
	1,125 (1,080) / 50i	—	○	
	1,125 (1,080) / 60p	—	○	
	1,125 (1,080) / 50p	—	○	
	1,125 (1,080) / 24p	—	○	

■ Auto mode

Auto mode determines the best aspect ratio to fill the screen. It does this using a four step process (WSS, Control signal through SCART / HDMI terminal, Letterbox detection, or Justify to fill the screen).

This process may take several minutes, depending on the darkness of the image.

Letterbox detection: If black bands at the top and bottom of the screen are detected, Auto mode chooses the best ratio and expands the image to fill the screen.

If no aspect signals are detected, Auto mode enhances the image for optimum viewing pleasure.

Note

- The ratio varies depending on the programme, etc. If the ratio is out of the standard 16:9, black bands at the top and bottom of the screen may appear.
- If the screen size looks unusual when a widescreen-recorded programme is played back on a VCR, adjust the tracking of the VCR. Read the manual of the VCR.

SD Card

- If the SD Card does not meet SD standards, it may cause the TV to malfunction.
- Do not remove the card while the TV is accessing data (this can damage card or TV).
- Do not touch the pins on the back of the card.
- Do not subject the card to a high pressure or impact.
- Insert the card in the correct direction (otherwise the card or TV may be damaged).
- Electrical interference, static electricity, or erroneous operation may damage the data or card.
- Back up the recorded data at regular intervals in case of deteriorated or damaged data or erratic operation of the TV. (Panasonic is not liable for any deterioration or damage of recorded data.)

DivX

ABOUT DIVX VIDEO:

DivX® is a digital video format created by DivX, Inc. This is an official DivX Certified device that plays DivX video. Visit www.divx.com for more information and software tools to convert your files into DivX video.

■ DivX video file

DivX Certified® to play DivX® video up to HD 1080p, including premium content.

Extension - “.divx” or “.avi”

Image resolution - Up to 1,920 × 1,080 pixels

Video

- Number of stream: Up to 1
- Codec: DIV3, DIV4, DIVX, DX50, DIV6
- FPS (Frame Per Second): Up to 60 fps

Audio

- Number of stream: Up to 8
- Format: MP3, MPEG, AC3
- Multi channel: AC3 is possible. MPEG multi is 2 ch conversion.

● GMC (Global Motion Compensation) is not supported.

■ Subtitle text file of DivX

Subtitles format - MicroDVD, SubRip, TMLayer

- The DivX video file and subtitles text file are inside the same folder, and the file names are the same except for the file extensions.
- If there are more than one subtitles text files inside the same folder, they are displayed in the following order of priority: “.srt”, “.sub”, “.txt”.
- To confirm or change the current subtitle status while playing DivX content, press the OPTION button to display Option Menu.
- Depending on the methods used to create the file or the state of recording, only parts of the subtitles may be displayed, or the subtitles may not be displayed at all.

Note

- Depending on how you make SD Card or USB Flash Memory, files and folders may not be displayed in the order you numbered.
- Depending on the software you use to create DivX files, the files may not play.
- Depending on how you create the files and the structure of folders, the files and folders may not be displayed.
- When there are many files and folders, operation may take time to complete or some files may not be displayed or playable.

ABOUT DIVX VIDEO-ON-DEMAND:

This DivX Certified® device must be registered in order to play DivX Video-on-Demand (VOD) content.

To generate the registration code, locate the DivX VOD section in the Setup Menu. Go to vod.divx.com with this code to complete the registration process and learn more about DivX VOD.

■ To show DivX VOD registration code → “DivX® VOD” in the Setup Menu (p. 39)

- If you want to generate the new registration code, you have to deregister the present registration code. After playing DivX VOD content once, the confirmation screen to deregister will be displayed in “DivX® VOD” in the Setup Menu. If you press the OK button on the confirmation screen, the deregistration code will be generated and you will not be able to play any contents that you purchased using the present registration code. You will obtain the new registration code by pressing the OK button on the deregistration code screen.
- If you purchase DivX VOD content using a registration code different from this TV’s code, you will not be able to play this content. (“Your device is not authorized to play this DivX protected video.” is displayed.)

■ Regarding DivX content that can only be played a set number of times

Some DivX VOD content can only be played a set number of times.

When you play this content, the remaining number of plays is displayed. You cannot play this content when the number of remaining plays is zero. (“This DivX rental has expired.” is displayed.)

- When playing this content, the number of remaining plays is reduced by one in the following conditions:
 - If you exit the current application.
 - If you go to the next or previous content.
 - If you play the other content.

Characters table for numeric buttons

You can enter characters by using numeric buttons for free input items.

Press the numeric button repeatedly until you reach the desired character.

- The character is set automatically if you do not press the button for one second.
- You can also set the character by pressing the OK button or other numeric buttons within one second.

Characters table:

Numeric buttons	The number of times to press										
	1	2	3	4	5	6	7	8	9	10	11

Technical Information

HDMI connection

HDMI (high-definition multimedia interface) is the world's first complete digital consumer AV interface complying with a non-compression standard.

HDMI allows you to enjoy high-definition digital images and high-quality sound by connecting the TV and the equipment.

HDMI-compatible equipment^(*1) with an HDMI or DVI output terminal, such as a DVD player, a set top box or a game equipment, can be connected to the HDMI terminal using an HDMI compliant (fully wired) cable.

For information about connections, see "External Equipment" (p. 98).

■ Applicable HDMI features

- Input audio signal : 2ch Linear PCM (sampling frequencies - 48 kHz, 44.1 kHz, 32 kHz)
- Input video signal : 480i, 480p, 576i, 576p, 720p, 1080i and 1080p
 - ➔ "Input signal that can be displayed" (p. 104)
 - Match the output setting of the digital equipment.
- Input PC signal : ➔ "Input signal that can be displayed" (p. 104)
 - Match the output setting of the PC.
- VIERA Link (HDAVI Control 5) : ➔ "VIERA Link" (p. 93)
- 3D
- Content Type
- Deep Colour
- x.v.Colour™
- Audio Return Channel^(*3) (HDMI2 terminal only)

■ DVI connection

If the external equipment has only a DVI output, connect to the HDMI terminal via a DVI to HDMI adapter cable^(*2). When the DVI to HDMI adapter cable is used, connect the audio cable to the audio input terminal (HDMI1 / 2 / 3: use COMPONENT-AUDIO terminals / HDMI4: use AV3 audio terminals).

Note

- Audio settings can be made on the "HDMI1 / 2 / 3 / 4 Input" in the Sound Menu. (p. 37)
- If the connected equipment has an aspect adjustment function, set the aspect ratio to "16:9".
- These HDMI connectors are "type A".
- These HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.
- Equipment having no digital output terminal may be connected to the input terminal of either "COMPONENT", "S-VIDEO", or "VIDEO" to receive analogue signals.
- This TV incorporates HDMI™ technology.

(*1): The HDMI logo is displayed on HDMI-compliant equipment.

(*2): Enquire at your local digital equipment retailer shop.

(*3): Audio Return Channel (ARC) is a function to be able to send digital sound signals via an HDMI cable.

PC connection

A PC may be connected to this TV so that the PC screen is displayed and sound is heard from the TV.

- PC signals that can be inputted: Horizontal scanning frequency 31 to 69 kHz; vertical scanning frequency 59 to 86 Hz (more than 1,024 signal lines could result in incorrect display of the image).
- A PC adapter is not necessary for the DOS/V-compliant D-sub 15-pin connector.

Note

- Some PC models cannot be connected to this TV.
- When using PC, set the colour display quality of PC to the highest position.
- For details of the applicable PC signals
 - ➔ "Input signal that can be displayed" (p. 104)
- Max. display resolution

Aspect	4:3	1,440 × 1,080 pixels
	16:9	1,920 × 1,080 pixels

- D-sub 15-pin connector signal

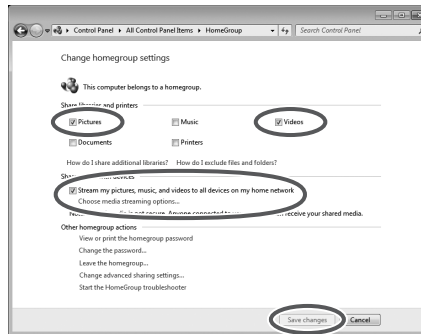

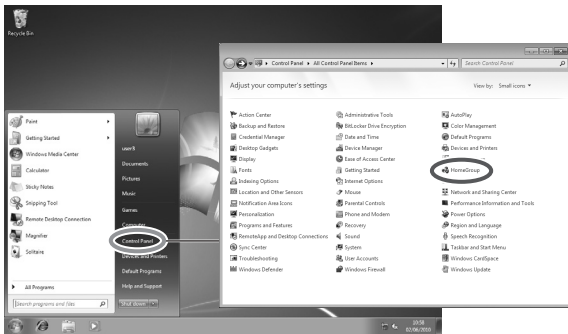

Pin No.	Signal Name	Pin No.	Signal Name	Pin No.	Signal Name
①	R	⑥	GND (Ground)	⑪	NC (not connected)
②	G	⑦	GND (Ground)	⑫	NC (not connected)
③	B	⑧	GND (Ground)	⑬	HD
④	NC (not connected)	⑨	NC (not connected)	⑭	VD
⑤	GND (Ground)	⑩	GND (Ground)	⑮	NC (not connected)

How to use Windows 7 as a media server

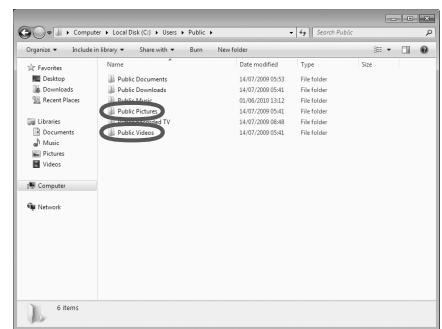

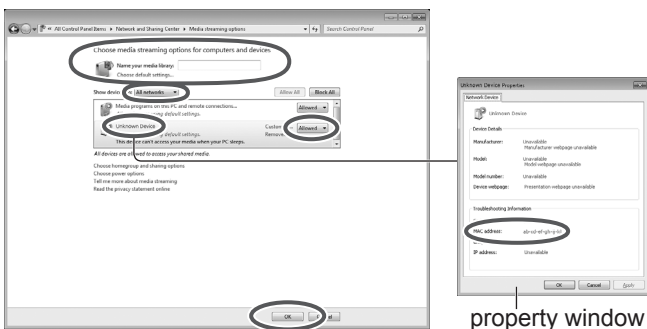

Follow the examples below to set up Windows 7 for use as a media server.

- Confirm the MAC Address of VIERA in "Network Setup" (p. 82).
- The following procedure and screens are examples. For more information, refer to the help functions of Windows 7.

① Open the Windows start menu and select [Control Panel]. Select [HomeGroup] in Control Panel window.

② Be sure [Pictures] and [Videos] of "Share libraries and printers" and [Stream my pictures, music, and videos to all devices on my home network] of "Share media with devices" are checked. (Check them and click [Save changes] if necessary). Then select [Choose media streaming options...].

③ In [Name your media library:] text box, enter a name that will identify your PC on VIERA. On the Show devices drop bar, select [All networks] to display all the available devices in the list. VIERA will be displayed as "Unknown Device". Click [Unknown Device] to confirm the MAC address of the device in property window. Find an [Unknown Device] that has the same MAC address as VIERA: that is your VIERA. Select [Allowed] so that VIERA can access your PC. Then, click [OK].

④ To share photos and videos with VIERA, put photo files into [Public Pictures] folder and video files into [Public Videos] folder under \Computer\Local Disk (C:)\Users\Public.

SCART and HDMI terminal information

AV1 SCART terminal (RGB, VIDEO, Q-Link)

Suitable inputs for AV1 include RGB (Red / Green / Blue).

AV2 SCART terminal (RGB, VIDEO, S-VIDEO, Q-Link)

AV2 - Pins 15 and 20 are dependent on AV2 S-VHS / VIDEO switching.

HDMI terminal

Technical Information

USB connection

- It is recommended to connect the USB HDD or USB Flash Memory directly to the TV's USB ports.
- Some USB devices or USB HUB may not be used with this TV.
- You cannot connect any devices by using USB card reader.

■ The combination of USB devices that have been tested for each TV's USB port.

Combination of USB port 1 + port 2 (and vice versa):

- USB HDD + USB Flash Memory
- USB HDD + Wireless LAN Adaptor
- USB HDD + USB Keyboard
- USB Flash Memory + Wireless LAN Adaptor
- USB Flash Memory + USB Keyboard
- Wireless LAN Adaptor + USB Keyboard

Note

- Additional information for USB devices may be on the following web site. (English only)
<http://panasonic.jp/support/global/cs/tv/>

Input signal that can be displayed

1,125 (1,080) / 24p		*

PC (from D-sub 15P)

Applicable input signal for PC is basically compatible to VESA standard timing.

Signal name	Horizontal frequency (kHz)	Vertical frequency (Hz)
640 × 400 @70 Hz	31.47	70.07
640 × 480 @60 Hz	31.47	59.94
640 × 480 @75 Hz	37.50	75.00
800 × 600 @60 Hz	37.88	60.32
800 × 600 @75 Hz	46.88	75.00
800 × 600 @85 Hz	53.67	85.06
852 × 480 @60 Hz	31.44	59.89
1,024 × 768 @60 Hz	48.36	60.00
1,024 × 768 @70 Hz	56.48	70.07
1,024 × 768 @75 Hz	60.02	75.03
1,024 × 768 @85 Hz	68.68	85.00
1,280 × 768 @60 Hz	47.70	60.00
1,280 × 1,024 @60 Hz	63.98	60.02
1,366 × 768 @60 Hz	48.39	60.04
Macintosh13" (640 × 480)	35.00	66.67
Macintosh16" (832 × 624)	49.73	74.55
Macintosh21" (1,152 × 870)	68.68	75.06

PC (from HDMI terminal)

Applicable input signal for PC is basically compatible to HDMI standard timing.

Signal name	Horizontal frequency (kHz)	Vertical frequency (Hz)
640 × 480 @60 Hz	31.47	60.00
750 (720) / 60p	45.00	60.00
1,125 (1,080) / 60p	67.50	60.00

Note

- Signals other than above may not be displayed properly.
- The above signals are reformatted for optimal viewing on your display.
- PC signal is magnified or compressed for display, so that it may not be possible to show fine detail with sufficient clarity.

FAQs

Before requesting service or assistance, please follow these simple guides to resolve the problem. If the problem still persists, please contact your local Panasonic dealer or Panasonic Customer Care Centre for assistance. For details → p. 116

Block noise, frozen or disappearing image occurs in digital mode / White spots or shadow image (ghosting) occurs in analogue mode / Some channels cannot be tuned

- Check the position, direction and connection of the aerial or dish.
- Check "Signal Condition" (p. 47, 50 or p. 52). If "Signal Quality" is displayed in red, the digital signal is weak.
- Check your postcode area is able to receive the Freeview channels at www.freeview.co.uk
- Digital signals may be relatively low to prevent interference with analogue signals for the period of Digital Switchover. Check the schedule of Digital Switchover at www.digitaluk.co.uk
- Weather conditions will affect signal reception (heavy rain, snow, etc.), in particular in poor reception areas. Even during good weather, high pressure can cause poor reception of some channels.
- Due to the digital reception technologies involved, quality of the digital signals may be relatively low in some cases, despite good reception of analogue channels.
- Turn the TV off with the Mains power On / Off switch, and then on again.
- If problem persists, consult your local dealer.

Neither image nor sound is produced

- Is the TV in AV mode?
- Check the correct AV input mode is selected.
- Check the mains lead is plugged into the socket outlet.
- Has the TV been turned On?
- Check the Picture Menu (p. 36) and volume.
- Check all required cables and connections are firmly in place.

Auto aspect

- Auto aspect is designed to provide you with the best ratio to fill the screen. (p. 100)
- Press the ASPECT button if you would like to change the aspect ratio manually (p. 18).

freesat Auto Setup cannot be done completely

- Check connections and dish alignment. The dish needs to be pointing at Astra 2 at 28.2° East, and Eurobird 1 at 28.5° East.
- If the problem persists, consult your freesat registered retailer or call Freesat (UK) Ltd on 08450 990 990 or visit www.freesat.co.uk

S-Video / black and white picture

- A black and white picture may be seen when the TV is set to S-Video when the connected equipment is not. Change the setting on the TV (p. 28).
- Check that the output of the external equipment matches the input of the TV. If the output of the external equipment is set to S-Video, the TV must also be set to S-Video (p. 28).

Input mode, i.e. EC/AV1 remains on the screen

- Press the **i** button to clear this message. Press again to redisplay.

Q-Link function does not work

- Confirm SCART cable and connection. Also set "AV1 / AV2 out" in the Setup Menu (p. 38).

"VIERA Link" function does not work and an error message appears

- Confirm the connection. (p. 90 and p. 91)
- Turn the connected equipment on and then switch the TV on. (p. 93)

Recording does not start immediately

- Check the settings of the recorder. For details, read the manual of the recorder.

Contrast is reduced

- Contrast is lowered in the following conditions without any user operation for a few minutes:
 - no signal in freesat, DVB, Other Sat. or AV mode
 - selection of a locked channel
 - selection of an invalid channel
 - selection of a radio channel
 - displayed menu
 - digital teletext (no video contents)
 - Thumbnail, list or still picture in Media Player or DLNA operations

FAQs

	Problem	Actions
Screen	Chaotic image, noisy	<ul style="list-style-type: none"> ● Set "P-NR" in the Picture Menu (to remove noise). (p. 36) ● Check nearby electrical products (fluorescent lamp, DECT phones, mobile phones, microwave, etc.).
	No image can be displayed	<ul style="list-style-type: none"> ● Is "Contrast", "Brightness" or "Colour" in the Picture Menu set to the minimum? (p. 36) ● Please also refer to "Neither image nor sound is produced" (p. 105).
	Blurry or distorted image (no sound or low volume)	<ul style="list-style-type: none"> ● Reset channels. (p. 44 and p. 45) ● Please also refer to "Neither image nor sound is produced" (p. 105).
	Unusual image is displayed	<ul style="list-style-type: none"> ● Turn the TV Off with Mains power On / Off switch, then turn it On again. ● If the problem persists, perform "Shipping Condition" (p. 55).
Sound	No sound is produced	<ul style="list-style-type: none"> ● Is "Sound mute" active? (p. 8) ● Is the volume set to the minimum? ● Is Speaker Selection (VIERA Link) set to "TV"? ● Please also refer to "Neither image nor sound is produced" (p. 105).
	Sound level is low or sound is distorted	<ul style="list-style-type: none"> ● Sound signal reception may be deteriorated. ● Set "NICAM" (p. 37) in the Sound Menu to "Off". (Analogue only) ● Please also refer to "Neither image nor sound is produced" (p. 105).
	Unusual sound from the TV	<ul style="list-style-type: none"> ● When power is on, whirring sound of cooling fan or drive noise may be heard from inside the TV (not a sign of faulty operation).
Digital Channel	No programmes shown on TV Guide	<ul style="list-style-type: none"> ● Reset channels. (p. 44 and p. 45) ● Check the digital transmission by contacting Digital UK on 08456 50 50 50 or at www.digitaluk.co.uk ● Check the analogue broadcast (if still available in your area). ● Consult an aerial or dish engineer to check the alignment of your aerial or dish.
	Cannot find a channel you have previously watched	<ul style="list-style-type: none"> ● The channel may broadcast for part of the day. ● Check the channel in the TV Guide. (p. 20) ● Channel position numbers may be changed by broadcasters. ● Reset channels. (p. 44 and p. 45)

	Problem	Actions
3D	Cannot see 3D images	<ul style="list-style-type: none"> ● Has the 3D Eyewear been switched On? ● Ensure that "Picture Display" in "3D Settings" is set to "3D". (p. 33) ● Some 3D image signals may not be automatically recognized as 3D images. Set "Signal Format" in "3D Settings" to match the picture format. (p. 33) ● Check that there are no obstacles between the infrared sensors on the TV and the 3D Eyewear. If the 3D Eyewear stops receiving the infrared signal for about 5 minutes, the 3D Eyewear will be turned off automatically. ● Check the coverage area to use the 3D Eyewear. (p. 31) ● Depending on the person, the 3D images may be difficult to see, or cannot be seen, especially in users that have a different level of eyesight between the left and right eyes. Take the necessary steps (wearing glasses etc.) to correct your eyesight before use.
	3D Eyewear is turned off automatically	<ul style="list-style-type: none"> ● Check that there are no obstacles between the infrared sensors on the TV and the 3D Eyewear or that the 3D Eyewear is placed inside the coverage area (p. 31). If the 3D Eyewear stops receiving the infrared signal for about 5 minutes, the 3D Eyewear will be turned off automatically.
	There is something wrong with the 3D images	<ul style="list-style-type: none"> ● Check the setting of "Picture Sequence" or "Edge Smoother". (p. 33)
HDMI	Sound is unusual	<ul style="list-style-type: none"> ● Set the sound setting of the connected equipment to "2ch L.PCM". ● Check the "HDMI1 / 2 / 3 / 4 Input" setting in the Sound Menu. (p. 37) ● If digital sound connection has a problem, select analogue sound connection. (p. 102)
	Pictures from external equipment are unusual when the equipment is connected via HDMI	<ul style="list-style-type: none"> ● Check the HDMI cable is connected properly. (p. 98) ● Turn the TV and equipment Off, then turn them On again. ● Check an input signal from the equipment. (p. 104) ● Check the output resolution of the equipment. ● Use equipment compliant with EIA/CEA-861/861B.

FAQs

	Problem	Actions
Network	Cannot connect to the network	<ul style="list-style-type: none"> ● Check the LAN cable or Wireless LAN Adaptor is connected properly. (p. 81) ● Check the connections and settings. (p. 81 - 85) ● Check the network equipment and network environment. ● The router may not be set to issue IP address automatically. If the network administrator prefers to allocate an IP address, set an IP address manually. (p. 83) ● The router may be using MAC address filtering (security setting). Confirm the MAC Address of this TV (p. 82) and set the router to be able to use it. ● If the problem persists, consult your Internet Service Provider or telecommunications company.
	Cannot select the file during DLNA operations	<ul style="list-style-type: none"> ● Is media server of the connected equipment prepared? (p. 80) ● Check applicable data format. (p. 80)
	Cannot operate VIERA CAST	<ul style="list-style-type: none"> ● Check the connections and settings. (p. 81 - 85) ● The server or connected line might be busy now.
Other	The TV does not switch On	<ul style="list-style-type: none"> ● Press and hold the standby On / Off switch on the remote control for about 1 second if Power LED is red. ● Check the mains lead is plugged into the socket. ● The fuse in the mains plug may have blown. Replace it with one of an identical rating (p. 4).
	The TV goes into Standby mode	<ul style="list-style-type: none"> ● Auto power standby function is activated. (p. 9) ● The TV enters Standby mode about 30 mins. after analogue broadcast ends.
	The remote control does not work or is intermittent	<ul style="list-style-type: none"> ● Are the batteries installed correctly? (p. 8) ● Has the TV been switched On? ● The batteries may be running low. Replace them. ● Point the remote control directly at the front of the TV (within about 7 m and a 30 degree angle of the front of the TV). ● Situate the TV so that sunshine or other sources of bright light do not shine on the TV's remote control signal receiver.
	Parts of the TV become hot	<ul style="list-style-type: none"> ● Temperature rises of parts of the front, top and rear panels will not pose any problems in terms of performance or quality of the TV.
	Overcurrent error message appears	<ul style="list-style-type: none"> ● The connected USB device might cause this error. Remove the device and turn the TV Off with Mains power On / Off switch, then turn it On again. ● Check if foreign objects are inside the USB port.
	An error message appears	<ul style="list-style-type: none"> ● Follow the message's instructions. ● If the problem persists, contact your local Panasonic dealer or the authorized Service Centre.

Message	Meaning / Action
Timer already expired !	▶ ● The starting time in Timer Programming has already passed. Set the timer correctly (p. 57).
Timer Event Due to Start ***:*** has been programmed for External (USB HDD) recording at **:***	▶ ● This message will appear 2 mins. before timer programming event for external (USB HDD) recording due to start.
Timer incorrect !	▶ ● Set the start and end times in Timer Programming correctly (p. 57).
Timer overlap. Press OK to keep, RETURN to edit.	▶ ● Timer programming events are overlapped. Press the OK button to keep the overlapped setting. "Ext Rec." and "USB HDD Rec." are given priority over "Reminder". When two or more "Ext Rec." / "USB HDD Rec." overlap, the first timer programming event starts and finishes as programmed. The next timer programming event can then start.
Tuner Locked Press EXIT to unlock and stop recording	▶ ● If you want to unlock the tuner, cancel Direct TV Recording (p. 92 and p. 94), the recording of Timer Programming (p. 57) or One Touch Recording.
Unable to download, please check equipment	▶ ● The tape or disc is active. Stop the equipment and try again.
3D image not available.	▶ ● You may use a function not available for 3D effect. Exit the function to view the 3D images.

■ Media Player

Cannot read file	▶ ● The file is damaged or unreadable. ● The TV does not support the format. (For the applicable formats and data → p. 72)
No Device Inserted	▶ ● Confirm the SD Card or USB device is inserted correctly.
No valid file to play	▶ ● The card has no data.
This operation is not possible	▶ ● The selected operation is not available.

■ Network

An internal error occurred.	▶ ● Check the settings. (p. 82 - 85)
Cannot read file	▶ ● The file is broken or unreadable. Check applicable data format. (p. 80)
Communication with the server failed.	▶ ● This might be a problem of the media server. Read the manual of the server software.
Connection to the server failed.	▶ ● Check the connections and settings. (p. 81 - 85)
Server not found	▶ ● There are no available media server on your home network. Check the connections and settings. (p. 81 - 85)
The software update is not completed.	▶ ● Network download failed. Check the connections and settings. (p. 81 - 85)
Ethernet cable not connected	▶ ● Check the connection of the LAN cable. If you use a hub, also check the light on the hub is lit. ● The LAN cable might be defective.

Maintenance

First, remove the mains plug from the socket outlet.

Display panel, Cabinet, Pedestal

Regular care:

Gently wipe the surface of the display panel, cabinet, or pedestal by using a soft cloth to clean the dirt or fingerprints. For stubborn dirt:

Dampen a soft cloth with clean water or diluted neutral detergent (1 part detergent to 100 parts water). Then wring the cloth and wipe the surface. Finally, wipe away all the moisture.

Caution

- Do not use a hard cloth or rub the surface too hard. This may cause scratches on the surface.
- Take care not to subject the TV's surfaces to water or detergent more than requires. A liquid inside the TV could lead to product failure.
- Take care not to subject the surfaces to insect repellent, solvent, thinner or other volatile substances. This may degrade surface quality or cause peeling of the paint.
- The surface of the display panel is specially treated and may be easily damaged. Take care not to tap or scratch the surface with your fingernail or other hard objects.
- Do not allow the cabinet or pedestal to make contact with a rubber or PVC substance for a long time. This may degrade surface quality.

Mains plug

Wipe the mains plug with a dry cloth at regular intervals. Moisture and dust may lead to fire or electrical shock.

Glossary

■ AAC

Advanced Audio Coding - An advanced audio compression method

■ AVCHD

Advanced Video Codec High Definition - A standard for high definition video cameras that can be used to record and play high resolution HD images

■ DLNA

Digital Living Network Alliance

■ DVB

Digital Video Broadcasting

■ DVD

Digital Versatile Disc

■ DVI

Digital Visual Interface - A high quality video interface standard to connect to the display

■ EPG

Electronic Programme Guide - A digital guide showing scheduled programmes

■ Frame Sequential

The 3D format that the separated images for the left and right eyes are recorded with the high definition quality and alternately played back at the high speed

■ HDMI

High-Definition Multimedia Interface - A digital audio and video interface for transmitting uncompressed digital signals on a single cable

■ JPEG

Joint Photographic Experts Group - A standard for compressing colour still pictures

■ LAN

Local Area Network

■ MAC Address

Media Access control Address

■ MKV

Matroska Video - Video file format that supports several types of audio and video codecs.

■ MPEG2

Moving Picture Experts Group phase 2 - A standard for efficiently compressing and expanding colour videos

■ MP3

MPEG Audio Layer 3 - A method for compressing audio data

■ NICAM

Near Instantaneous Companded Audio Multiplex - A format for digital sound over television

■ NTSC

National Television System Committee - One of the television signals used in USA, etc.

■ RF

Radio Frequency - Signal received from terrestrial aerial

■ RGB / S-Video / Video

Choose between these three video formats depending on personal preference and equipment requirement (RGB - Red, Green and Blue)

■ SCART

21 pin connection used for video, audio and switching signals (Also known as Euro SCART and Peritel)

■ Shop viewing environment

Shop viewing environment is the demonstration mode to explain main features of this TV in an easy understandable way. This mode will work if you select "Shop" in "Auto Setup" (p. 15).

■ Side by Side

One of the types of 3D format available for broadcasts

■ SPDIF

A standard audio transfer file format

■ Top and Bottom

One of the types of 3D format available for broadcasts

■ USB

Universal Serial Bus - An interface specification to connect devices

■ VCR

Video Cassette Recorder

Specifications

Power Source		AC 220-240 V, 50 / 60 Hz		
Rated Power Consumption		335 W		
Standby Power Consumption		0.40 W 32.00 W (With monitor out recording)		
Display panel	Aspect Ratio	16:9		
	Visible screen size	106 cm (diagonal) 921 mm (W) × 518 mm (H)		
	Number of pixels	2,073,600 (1,920 (W) × 1,080 (H)) [5,760 × 1,080 dots]		
Sound	Speaker	120 mm × 35 mm × 2 pcs, 6 Ω		
	Audio Output	20 W (10 W + 10 W)		
	Headphones	M3 (3.5 mm) stereo mini Jack × 1		
PC signals		VGA, SVGA, WVGA, XGA SXGA, WXGA (compressed) Horizontal scanning frequency 31 - 69 kHz Vertical scanning frequency 59 - 86 Hz		
Receiving Systems / Band name		<p>DVB-S / S2 (freesat / Other Sat.) : freesat services via Satellite dish input. Receiver frequency range - 950 MHz to 2,150 MHz LNB Power and Polarisation - Vertical: +13 V Horizontal: +18 V Current: Max. 500 mA (overload protection) 22 kHz Tone - Frequency: 22 kHz ± 2 kHz Amplitude: 0.6 V ± 0.2 V Symbol Rate - Max. 30 MS/s FEC Mode - 1/2, 3/5, 2/3, 3/4, 4/5, 5/6, 8/9, 9/10 Demodulation- QPSK, 8PSK Not available for DiSEqC control.</p> <p>DVB-T / T2 : Digital terrestrial services via UHF aerial input. PAL I : UHF E21-68 PAL 525/60 : Playback of NTSC tape from some PAL Video recorders (VCR) or NTSC disc playback from DVD player and recorder. M.NTSC : Playback from M.NTSC Video recorders (VCR). NTSC : Playback from NTSC Video recorders (VCR). (AV input only)</p>		
Satellite dish input		Female F-type 75 Ω		
Aerial input		UHF		
Operating Conditions		Temperature : 0 °C - 35 °C Humidity : 20 % - 80 % RH (non-condensing)		
Connection Terminals	AV1 (SCART terminal)	21 Pin terminal (Audio/Video in, Audio/Video out, RGB in, Q-Link)		
	AV2 (SCART terminal)	21 Pin terminal (Audio/Video in, Audio/Video out, RGB in, S-Video in, Q-Link)		
	AV3	VIDEO	RCA PIN Type × 1	1.0 V[p-p] (75 Ω)
		AUDIO L - R	RCA PIN Type × 2	0.5 V[rms]
	COMPONENT	VIDEO	Y	1.0 V[p-p] (including synchronization)
			P_B, P_R	±0.35 V[p-p]
		AUDIO L - R	RCA PIN Type × 2	0.5 V[rms]
		Others	HDMI 1 / 2 / 3 / 4	TYPE A Connectors HDMI1 / 3 / 4: HDMI (Version 1.4 with 3D, Content Type), Deep Colour, x.v.Colour™ HDMI2 : HDMI (Version 1.4 with 3D, Content Type, Audio Return Channel), Deep Colour, x.v.Colour™ ● This TV supports "HDMI Control 5" function.
	PC		HIGH-DENSITY D-SUB 15PIN R,G,B/0.7 V[p-p] (75 Ω) HD, VD/TTL Level 2.0 - 5.0 V[p-p] (high impedance)	
	Card slot		SD Card slot × 1 Common Interface slot × 1	
	ETHERNET		RJ45, IEEE802.3 10BASE-T / 100BASE-TX	
	Output	USB 1 / 2	USB2.0 DC 5 V, Max. 500 mA ● For available USB devices ➔ p. 104	
		AUDIO L - R	RCA PIN Type × 2	0.5 V[rms] (high impedance)
DIGITAL AUDIO OUT		PCM / Dolby Digital, Fiber optic		
Dimensions (W × H × D)		1,029 mm × 693 mm × 308 mm (With Pedestal) 1,029 mm × 654 mm × 82 mm (TV only)		
Mass		23.5 kg Net (With Pedestal) 20.5 kg Net (TV only)		

Note

- Design and Specifications are subject to change without notice. Mass and Dimensions shown are approximate.
- This equipment complies with the EMC standards listed below.
EN55013, EN61000-3-2, EN61000-3-3, EN55020, EN55022, EN55024

Information for Users on Collection and Disposal of Old Equipment and used Batteries

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.

By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

[Information on Disposal in other Countries outside the European Union]

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
